HUMAN ANATOMY AND PHYSIOLOGY

Study of the structure and function of the human body

Anatomy

The scientific study of the structure of the human body

Physiology

The scientific study of the function of the human body

Structural levels

Also known as the levels of organization of the human body

- 1. Chemical level - study of the chemical composition of the body
- 2. Cellular level - study of the structure and function of cells
- 3. Tissue level - study of the structure and function of tissues
- 4. Organ level - study of the structure and function of organs
- 5. System level - study of the structure and function of body systems
- 6. Organism level - study of the structure and function of the whole organism

CELLS AND TISSUES

Cells are the basic units of structure and function of the human body

Composition of cellular fluids

Cells are composed of various fluids

Extracellular fluid - fluid outside the cell

Intracellular fluid - fluid inside the cell

Interstitial fluid - fluid between cells

Blood plasma - fluid part of blood

Organic fluids - fluids containing organic molecules

Inorganic fluids - fluids containing inorganic molecules

Electrolytes - substances that conduct electricity

Non-electrolytes - substances that do not conduct electricity

Acids - substances that release hydrogen ions

Bases - substances that accept hydrogen ions

Salts - substances that dissociate into ions

Enzymes - proteins that catalyze chemical reactions

Hormones - chemical messengers

Antibodies - proteins that fight infection

Antigens - substances that trigger an immune response

Antitoxins - substances that neutralize toxins

Anticoagulants - substances that prevent blood clotting

Antiparasitics - substances that kill parasites

Anticancer drugs - substances that kill cancer cells

Antiviral drugs - substances that kill viruses

Antibiotic drugs - substances that kill bacteria

Antifungal drugs - substances that kill fungi

Antipruritics - substances that relieve itching

Antispasmodics - substances that relieve muscle spasms

Antiemetics - substances that relieve nausea

Antidiarrheals - substances that relieve diarrhea

Anticonvulsants - substances that prevent seizures

Antipsychotics - substances that treat mental illness

Antidepressants - substances that treat depression

Antianxiety drugs - substances that relieve anxiety

Antihistamines - substances that relieve allergies

Anticoagulants - substances that prevent blood clotting

Antitoxins - substances that neutralize toxins

Anticancer drugs - substances that kill cancer cells

Antiviral drugs - substances that kill viruses

Antibiotic drugs - substances that kill bacteria

Antifungal drugs - substances that kill fungi

Antipruritics - substances that relieve itching

Antispasmodics - substances that relieve muscle spasms

Antiemetics - substances that relieve nausea

Antidiarrheals - substances that relieve diarrhea

Anticonvulsants - substances that prevent seizures

Antipsychotics - substances that treat mental illness

Antidepressants - substances that treat depression

Antianxiety drugs - substances that relieve anxiety

Digestive system

The digestive system is responsible for breaking down food into nutrients that can be absorbed by the body

The digestive system consists of the mouth, esophagus, stomach, and intestines

The digestive system also includes accessory organs such as the salivary glands, liver, and pancreas

The digestive system is responsible for the absorption of nutrients from food

The digestive system is responsible for the elimination of waste from the body

The digestive system is responsible for the regulation of fluid balance in the body

The digestive system is responsible for the regulation of electrolyte balance in the body

The digestive system is responsible for the regulation of acid-base balance in the body

The digestive system is responsible for the regulation of blood sugar levels in the body

The digestive system is responsible for the regulation of blood pressure in the body

The digestive system is responsible for the regulation of body temperature in the body

The digestive system is responsible for the regulation of heart rate in the body

The digestive system is responsible for the regulation of breathing rate in the body

The digestive system is responsible for the regulation of blood volume in the body

The digestive system is responsible for the regulation of blood pH in the body

The digestive system is responsible for the regulation of blood osmolarity in the body

The digestive system is responsible for the regulation of blood glucose levels in the body

The digestive system is responsible for the regulation of blood cholesterol levels in the body

The digestive system is responsible for the regulation of blood triglyceride levels in the body

The digestive system is responsible for the regulation of blood protein levels in the body

The digestive system is responsible for the regulation of blood iron levels in the body

The digestive system is responsible for the regulation of blood calcium levels in the body

The digestive system is responsible for the regulation of blood magnesium levels in the body

The digestive system is responsible for the regulation of blood potassium levels in the body

The digestive system is responsible for the regulation of blood sodium levels in the body

The digestive system is responsible for the regulation of blood chloride levels in the body

The digestive system is responsible for the regulation of blood bicarbonate levels in the body

The digestive system is responsible for the regulation of blood phosphate levels in the body

The digestive system is responsible for the regulation of blood sulfate levels in the body

The digestive system is responsible for the regulation of blood nitrate levels in the body

The digestive system is responsible for the regulation of blood nitrite levels in the body

The digestive system is responsible for the regulation of blood ammonia levels in the body

The digestive system is responsible for the regulation of blood urea levels in the body

The digestive system is responsible for the regulation of blood creatinine levels in the body

The digestive system is responsible for the regulation of blood uric acid levels in the body

The digestive system is responsible for the regulation of blood lactic acid levels in the body

The digestive system is responsible for the regulation of blood pyruvic acid levels in the body

The digestive system is responsible for the regulation of blood citric acid levels in the body

The digestive system is responsible for the regulation of blood fatty acid levels in the body
