Annihilation A Novel The Southern Reach Trilogy 1:

A History of the Literature of the U.S. South: Volume 1 Harilaos Stecopoulos, 2021-05-05 A History of the Literature of the U S South provides scholars with a dynamic and heterogeneous examination of southern writing from John Smith to Natasha Trethewey Eschewing a master narrative limited to predictable authors and titles the anthology adopts a variegated approach that emphasizes the cultural and political tensions crucial to the making of this regional literature Certain chapters focus on major white writers e g Thomas Jefferson William Faulkner the Agrarians Cormac McCarthy but a substantial portion of the work foregrounds the achievements of African American writers like Frederick Douglass Zora Neale Hurston and Sarah Wright to address the multiracial and transnational dimensions of this literary formation Theoretically informed and historically aware the volume s contributors collectively demonstrate how southern literature constitutes an aesthetic cultural and political field that richly repays examination from a variety of critical perspectives The American Climate

Emergency Narrative Johan Höglund, 2024-07-19 The American Climate Emergency Narrative reveals how much of what has been called climate fiction casts ecological breakdown as an emergency for American capitalist modernity rather than for the planet The book traces the origins of this narrative back to the arrival of settler capitalism in America when the understanding of the planet and its people as extractable resources was established Since then this narrative has elided the violent history of the climate crisis while at the same time leveraging the military as a bulwark against the crises capitalism has caused the people it has uprooted even the ailing planet itself This is an open access book **Annihilation - 101**

21st century recognition of an environmental crisis **Science Fiction beyond Borders** Shawn Edrei, Danielle Gurevitch, 2016-12-14 Since the turn of the previous century science fiction and its native tropes have been used by authors artists filmmakers and critics in order to challenge boundaries whether these be conceptual literary or metaphorical Uniquely inherent to the genre is its ability to explore as a form of thought experiment different ways of crossing and subverting borders previously thought to be inviolable these transgressions and their effects on popular culture have in turn led to an increased presence of science fiction studies in academia This volume features papers presented at the 2014 and 2015 Science Fiction Symposia held at Tel Aviv University These essays submitted by an eclectic mix of scholars from different disciplines institutes and walks of life demonstrate the diversity and adaptability of science fiction as a tool for asking and answering impossible questions *Transformed States* Martin Halliwell, 2024-11-15 *Transformed States* offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from *Oryx* and *Crake* to *Annihilation* and from *Gattaca* to *Avatar* By assessing the complex relationship between federal politics and the biomedical industry *Transformed States* develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise To that end Martin Halliwell analyzes thirty years that radically transformed American science medicine and policy positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested Along with the two earlier books *Therapeutic Revolutions* 2013 and *Voices of Mental Health* 2017 *Transformed States* is the final volume of a landmark cultural and intellectual history of mental health in the United States journeying from the combat zones of World War II to the global emergency of COVID 19 *Other Globes* Simon Ferdinand, Irene Villaescusa-Illán, Esther Peeren, 2019-05-13 This volume challenges dominant imaginations of globalization by highlighting alternative visions of the globe world earth or planet that abound in cultural social and political practice In the contemporary context of intensive globalization ruthless geopolitics and unabated environmental exploitation these other globes offer paths for thinking anew the relations between people polities and the planet Derived from disparate historical and cultural contexts which include the Holy Roman Empire late medieval Brabant the post colonial Philippines early twentieth century Britain contemporary Puerto Rico occupied Palestine postcolonial Africa and Chile and present day California the past and

peripheral globes analyzed in this volume reveal the variety of ways in which the global has been and might be imagined As such the fourteen contributions underline that there is no neutral natural or universal way of inhabiting the global

New Weird Fiction and the Anthropocene Trang Dang, 2025-07-24 This book explores the development of ecological awareness in Jeff VanderMeer's New Weird novels focusing specifically on the Southern Reach 2014 2024 and Borne 2017 2019 series Examining the New Weird genre as an understudied part of climate fiction the chapters investigate how these texts language content and form develop unique and fascinating ways in which one can think and live more ecologically As the first book length study on VanderMeer's work to contextualize his novels through object oriented ontology OOO an emerging branch of speculative philosophy that investigates how things exist this work enables a uniquely experimental reading of VanderMeer one that accentuates how his work unsettles what is perceived as normal and exposes the bounds of human reasoning as well as how we understand ourselves and our relationships with nonhumans Dang also engages with interdisciplinarity situating VanderMeer's work within cultural discourse around the Anthropocene environmental anthropology prehistoric archeology evolutionary biology and Indigenous studies

Novel Ecologies Allison Carruth, 2025-03-04 Tracing the convergence of ecology and engineering over the last three decades this book pinpoints a new environmental paradigm that the author calls Nature Remade Allison Carruth's *Novel Ecologies* shows how the tech industry has taken up the wilderness mythologies that shaped one strain of American environmentalism over the last century Calling this twenty first century environmental imagination Nature Remade Carruth describes a distinctly West Coast framework that is at once nostalgic and futuristic Through three case studies synthetic wildlife the digital cloud and space colonization the book shows Nature Remade to be a quasi religious

belief in venture capitalism and big tech This paradigm thus imagines a future in which species ecosystems and entire planets are re generated and re created through engineering Novel Ecologies challenges the conviction that climate change and other environmental crises must be met with ever larger scale forms of technological intervention Against the new worlds conjured by Google Meta Open AI Amazon SpaceX and a host of lesser known start ups Carruth marshals writers and artists who imagine provisionally hopeful environmental futures while refusing to forget the histories that have made the world what it is On this track of the book Carruth discusses the works of Octavia Butler Becky Chambers Jennifer Egan Ruth Ozeki Craig Santos Perez Tracy K Smith Jeff VanderMeer Saya Woolfalk and many more Their novels poems installation artworks and expressive media offer a speculative world built on livable communities rather than engineered lifeforms

Surreal Entanglements Louise Economides, Laura Shackelford, 2021-05-18 This edited collection approaches the most pressing discourses of the Anthropocene and posthumanist culture through the surreal yet instructive lens of Jeff VanderMeer's fiction In contrast to universalist and essentializing ways of responding to new material realities VanderMeer's work invites us to re imagine human subjectivity and other collectivities in the light of historically unique entanglements we face today the ecological technological aesthetic epistemological and political challenges of life in the Anthropocene era Situating these messy multi scalar material complexities of life in close relation to their ecological material and colonialist histories his fiction renders them at once troublingly familiar and strangely generative of other potentialities and insight The collection measures VanderMeer's work as a new kind of speculative surrealism his texts capturing the strangeness of navigating a world in which nature has become radically uncanny due to global climate change and powerful bio technologies The first collection to survey academic engagements with VanderMeer this book brings together scholars in the fields of environmental literature science fiction genre studies American literary history philosophy of technology and digital cultures to reflect on the environmentally culturally aesthetically and politically central questions his fiction poses to predominant understandings of the Anthropocene

Daniels, 2025-05-22 A Phenomenology of the Alien Encounters with the Weird and Inscrutable Other considers both literal and figurative experiences of the alien from a psychological psychoanalytic and philosophical perspective Throughout the book the authors wrestle with the unexplained ineffable unspeakable sublime uncanny abject and Mi ville's abecanny This collection provides phenomenologies of encounters with the inscrutably alien from lights in the sky dark corners of Weird fictional landscapes architecture technology or the clinical symptom The chapters examine fictional and nonfictional encounters with what exceeds the capacity to make sense taking a new approach to the topic of alterity and inviting the reader to examine how these encounters reflect our contemporary condition culturally individually clinically theologically and philosophically Bridging cultural psychoanalytic literary clinical media and religious studies the novel approaches in this volume will be of interest to students and scholars alike

Animal Husbandry: Bestiality in Medieval Culture , 2025-08-28 How was bestiality perceived in the Middle

Ages The answer is far from simple Depending on the context it might be a kingmaking ritual a boys game a pact with the devil a peccadillo or a capital offense As dangerous as it could be to be suspected by one s own neighbors of committing bestiality medieval literature and art are full of often exhilarating erotic interspecies encounters In the end this volume suggests that there is a zoophilic streak in all humans the medievals as well as ourselves Contributors are Crystal Beamer Bailey Flannery Katherine Leach Marian E Polhill Anna Russakoff Joyce E Salisbury Andrea Schutz Jacqueline A Stuhmiller Larissa Tracy and Tess Wingard

Eco-Theory and Annihilation Evan Gottlieb, 2025-03-06 Eco theory and Annihilation is part of the Film Theory in Practice series which blends the explanation of a film theory with the interpretation of a film and provides discrete examples of how film theory can serve as the basis for textual analysis This book offers a concise introduction to eco theory in jargon free language and shows how this theory can be deployed to interpret Alex Garland s controversial film adaptation of Jeff VanderMeer s hit novel Annihilation Eco theory is one of the most exciting and timely offshoots of contemporary critical theory but it is too frequently treated as only a recent development Covering historical developments in nature philosophy geology and organic chemistry as well as contemporary critical methodologies like systems theory and new materialism Eco Theory and Annihilation introduces readers to the full extent of eco theory s lively variations as well as investigates the complications that arise when those variations are mediated by the generic expectations of filmic science fiction This book illuminates the deep history of eco theory maps its contemporary coordinates and demonstrates how it can shed light on Garland s provocative eco sci fi thriller

Covert Plants Prudence Gibson, Baylee Brits, 2018 Covert Plants contributes to newly emerging discourses on the implications of vegetal life for the arts and culture This stretches to changes in our perception of nature and to the adapting roles of botany evolutionary ecology and environmental aesthetics in the humanities Its editors and contributors seek various expressions of vegetal life rather than the mere representation of such and they proceed from the conviction that a rigorous approach to thinking with and through vegetal life must be interdisciplinary At a time when urgent calls for restorative care and

reparative action have been sounded for the environment this essay volume presents a range of academic and creative perspectives from evolutionary biology to literary theory philosophy to poetry which respond to the perplexing problems and paradoxes of vegetal thinking Representations of vegetal life often include plant analogies and plant imagery These representations have at times obscured the diversity of plant behavior and experience Covert Plants probes the implications of vegetal life for thought and how new plant science is changing our perception of the vegetal around us and in us How can we think speak and write about plant life without falling into human nature dyads or without tumbling into reductive theoretical notions about the always complex relations between cognition and action identity and value subject and object A full view of this shifting perspective requires a stereoscopic lens through which to view plants but also simultaneously to alter our human centered viewpoint Plants are no longer the passive object of contemplation but are increasingly resembling subjects stakeholders or actors As such the plant now makes unprecedented demands upon the nature of contemplation itself Moreover the aesthetic political and legal implications of new knowledge regarding plants ability to communicate sense and learn require intensive cross disciplinary investigation By doing this we can intervene into current attitudes to climate change and sustainability and hopefully revise for the better human philosophies ethics and aesthetics that touch upon plant life

Gothic Things Jeffrey Andrew Weinstock, 2023-07-04 SHORTLISTED THE ALLAN LLOYD SMITH PRIZE FOR BEST MONOGRAPH Offering an innovative approach to the Gothic Gothic Things Dark Enchantment and Anthropocene Anxiety breaks ground with a new materialist analysis of the genre highlighting the ways that since its origins in the eighteenth century the Gothic has been intensely focused on ominous matter and thing power In chapters attending to gothic bodies spaces books and other objects Gothic Things argues that the Gothic has always been about what happens when objects assume mysterious animacy or potency and when human beings

are reduced to the status of just one thing among many more powerful others In exploring how the Gothic insistently decenters the human Jeffrey Andrew Weinstock reveals human beings to be enmeshed in networks of human and nonhuman forces mostly outside of their control Gothic Things thus resituates the Gothic as the uncanny doppelgänger of twenty first century critical and cultural theory lurking just beneath the surface and sometimes explicitly surfacing as it haunts considerations of how human beings interact with objects and their environment In these pages the Gothic offers a dark reflection of the contemporary nonhuman turn expressing a twenty first century structure of feeling undergirded by anxiety over the fate of the human spectrality monstrosity and apocalypse Substituting horror for hope the Gothic Weinstock explains has been a philosophical meditation on human relations to the nonhuman since its inception raising significant questions about how we can counter anthropocentric thought in our quest to live more harmoniously with the world around us The Cambridge Companion to American Horror Stephen Shapiro, Mark Storey, 2022-08-04 Taking Horror seriously the book surveys America's bloody and haunted history through its most terrifying cultural expressions
