Westiana: a Catalogue of the Curious and Truly Valuable Library of the Late James West, ... Digested by Samuel Paterson. Which ... Will be Sold by Auction, by Mess. Langford, ... on Monday, the 29th of March 1773, ... Samuel Paterson,1773 **Anatomies** Hugh Aldersey-Williams,2014 Death and the Body in the Eighteenth-Century Novel Jolene Zigarovich,2023-01-10 Death and the Body in the Eighteenth Century Novel demonstrates that archives continually speak to

the period's rising funeral and mourning culture as well as the increasing commodification of death and mourning typically associated with nineteenth century practices. Drawing on a variety of historical discourses such as wills, undertaking histories, medical treatises and textbooks, anatomical studies, philosophical treatises and religious tracts and sermons, the book contributes to a fuller understanding of the history of death in the Enlightenment and its narrative transformation. *Death and the Body in the Eighteenth Century Novel* not only offers new insights about the effect of a growing secularization and commodification of death on the culture and its productions but also fills critical gaps in the history of death using narrative as a distinct literary marker. As anatomists dissected, undertakers preserved, jewelers encased and artists figured the corpse, so too the novelist portrayed bodily artifacts. Why are these morbid forms of materiality entombed in the novel? Jolene Zigarovich addresses this complex question by claiming that the body itself, its parts or its preserved representation functioned as secular memento, suggesting that preserved remains became symbols of individuality and subjectivity. To support the conception that in this period notions of self and knowing center upon theories of the tactile and material, the chapters are organized around sensory conceptions and bodily materials such as touch, preserved flesh, bowel, heart, wax, hair and bone. Including numerous visual examples, the book also argues that the relic represents the slippage between corpse and treasure, sentimentality and materialism, and corporeal fetish and aesthetic accessory. Zigarovich's analysis compels us to reassess the eighteenth century response to and representation of the dead and dead-like body and its material purpose and use in fiction. In a broader framework, *Death and the Body in the Eighteenth Century Novel* also narrates a history of the novel that speaks to the cultural formation of modern individualism.

In Pursuit . . . Joanna FitzPatrick, 2010-12-07. In *Pursuit*, reinvents the life of Katherine Mansfield. 1988-1923, the modernist writer who revolutionized the short story, created the only writing Virginia Woolf was ever jealous of and was consumed by tuberculosis at thirty-four. Intertwined into the story are Katherine's letter and journal writings that reveal her volatile relationships with her husband, her caregiver Ida, and her extraordinary passion for life as she fights against a disease that saps her energy and steals her time to write. The story begins in London where Mansfield has married her long-time lover John Middleton Murry. Soon after, on her thirtieth birthday, she is diagnosed with tuberculosis and told she has a few years to live if she stops writing, moves to a sanatorium, and promises to live a quiet, passive life. Too young for such a prognosis, she attempts a home cure that fails. Then a wandering consumptive with a fierce grip on life and her writing tools, she travels from London to Paris to the Riviera and to the Alps in pursuit of a cure, not only for herself but through her work, perhaps for others.

In Pursuit: The Katherine Mansfield Story Retold is an absorbing tale of desire, impermanence, and atonement. A haunting exploration of one woman's powerful determination to live a full and challenging life in spite of the limitations forced upon her by illness.
