And Then Came Lili English Edition:

Lily's Grammar of Latin in English: An Introduction of the Eyght Parties of Speche, and the Construction of the Same
William Lily, 2013-06-27 This is an edition of the sixteenth century Latin grammar which became by Henry VIII's acclamation the first authorized text for the teaching of Latin in grammar schools in England. It deeply influenced the study of Latin and the understanding of grammar. This edition includes chapters on its origins, composition, and subsequent history.

Humphrey Jennings and British Documentary Film: A Re-assessment Philip C. Logan, 2016-05-13 Humphrey Jennings ranks amongst the greatest film makers of twentieth century Britain. Although a relatively unknown figure to the wider public, his war time documentaries are regarded by many, including Lord Puttnam, Lindsay Anderson, and Mike Leigh, as amongst the finest films of their time. Groundbreaking both in terms of their technique and their interest in and respect for the everyday experiences of ordinary people, these films are much more than mere government propaganda. Instead, Jennings' work offers an unparalleled window into the British home front and the hopes, fears, and expectations of a nation fighting for its survival. Yet until now, Jennings has remained a shadowy figure, with his life and work lacking the sustained scholarly investigation and reassessment they deserve. As such, film and social historians will welcome this new book, which provides an up to date and thorough exploration of the relationships between Jennings' life, ideas, and films. Arguing that Jennings' film output can be viewed as part of a coherent intellectual exercise, rather than just one aspect of the artistic interests of a wide ranging intellectual, Philip Logan paints a much fuller and more convincing picture of the man than has previously been possible. He shows for the first time exactly how Jennings' artistic expression was influenced by the fundamental intellectual, social, and cultural changes that shook British society during the first decades of the twentieth century. Combining biography, social history, and international artistic thought, the book offers a fascinating insight into Jennings, his work, the wider British documentary film movement, and the interaction between art and propaganda. Bringing together assessments of his tragically short life and his films, this book is essential reading for anyone with an interest in British cinema or the social history of Britain in the 1930s and 40s.

Perspectives on the Marine Animal Forests of the World Sergio Rossi, Lorenzo

Bramanti, 2021-02-06 Marine Animal Forests MAFs are spread all over the world Composed by suspension feeding organisms e.g. corals gorgonians sponges bryozoans bivalves etc MAFs constitute a vast number of marine ecosystems such as coral reefs cold water corals sponge grounds bivalve beds etc The surface covered by these systems is prominent at the scale of the oceans of the planet though poorly known In a previous book Marine Animal Forests the ecology of benthic biodiversity hotspots several aspects of the MAFs were described and discussed building the basis for a holistic approach with the aim of putting these shallow and deep sea ecosystems under a common umbrella The main target of the present book is to identify and address important topics which were not covered in the previous three volumes Bryozoans or Polychaeta for example are treated in this volume as well as hydrothermal vents ecosystems and submarine caves the chemical ecology in MAFs or the nursery effect on these ecosystems The vastity of the MAF concept opens new insights in the biology physiology biodiversity of the organisms structuring these highly biodiverse ecosystems and on the dangers threatening them such as microplastics or the role of invasive species as an impact of their trophic ecology or distribution In a fast changing world in which the complexity of MAFs is at risk we propose an in depth analysis of many aspects that may be inspirational for future research lines in marine biology and ecology
