Professional Learners Doctoral education has changed dramatically over the last three decades Traditionally pursuit of a
doctoral or research credential involved intense study at a large traditional research university and was reserved for those
seeking careers in academia or research The process of completing doctoral level work at traditional universities usually
required a commitment to full time study varied tremendously between institutions and was often somewhat mysterious
Today all this has changed The emergence and growth of online education has led to a proliferation of doctoral learning
possibilities for busy professionals Individuals in the industry nonprofit and education are sectors are pursuing doctoral study
as a means to advance their careers increase their market value in the workplace and establish their professional stature If
this sounds like you then you have come to the right place Recipes for Success is the book that will launch you on a
successful quest for the doctoral degree Dissertations are very personal endeavors and accomplishments originating with
problems and issues that are meaningful and important to the doctoral learner These professionals are deeply grounded in
their understanding of the issues and needs of their profession Recipes build on this this understanding helping learners to
discover and frame issues they are passionate about and construct a credible and influential research study around this
passion While most dissertation guides focus largely or exclusively on the mechanics of writing and organization Recipes

approaches dissertation development as an iterative process of thinking and self reflection that leads learners to discover what matters most to them and to their professions and enables them to frame this meaning into a research problem and purpose and to organize and execute a study design to fit and thus solve the problem and achieve the purpose From the very beginning of your doctoral journey to the ultimate achievement of degree completion this book is your guide to the process and content of dissertation and research creation In *Recipes for Success* we articulate a process by which you can build the pieces of a successful and influential dissertation Using a workbook approach rich in tools templates frameworks examples web integration and hard won lessons from experience *Recipes* provides a friendly easy to navigate process crafting issues and ideas into research and results Based on our 40 years of collective experience in the online educational setting mentoring over 300 professional learners to success in completing their doctorates including numerous award winners we identify the most important factors for success and the traps to avoid Whether you are considering doctoral study are already in a doctoral program or are working to develop and complete your dissertation you will find *Recipes for Success* a key ingredient in your success as a doctoral learner Our graduates tell us that *Recipes* is THE book that made a difference in their doctoral career and success YOU can do it too Good luck on your doctoral journey **Resources in Education** ,1999

Innovative Methods of Teaching and Learning Chemistry in Higher Education Ingo Eilks, Bill Byers, 2015-11-06 Two recent initiatives from the EU namely the Bologna Process and the Lisbon Agenda are likely to have a major influence on European Higher Education It seems unlikely that traditional teaching approaches which supported the elitist system of the past will promote the mobility widened participation and culture of life long learning that will provide the foundations for a future knowledge based

economy There is therefore a clear need to seek new approaches to support the changes which will inevitably occur The European Chemistry Thematic Network ECTN is a network of some 160 university chemistry departments from throughout the EU as well as a number of National Chemical Societies including the RSC which provides a discussion forum for all aspects of higher education in chemistry This handbook is a result of one of their working groups who identified and collated good practice with respect to innovative methods in Higher Level Chemistry Education It provides a comprehensive overview of innovations in university chemistry teaching from a broad European perspective The generation of this book through a European Network with major national chemical societies and a large number of chemistry departments as members make the book unique The wide variety of scholars who have contributed to the book make it interesting and invaluable reading for both new and experienced chemistry lecturers throughout the EU and beyond The book is aimed at chemistry education at universities and other higher level institutions and at all academic staff and anyone interested in the teaching of chemistry at the tertiary level Although newly appointed teaching staff are a clear target for the book the innovative aspects of the topics covered are likely to prove interesting to all committed chemistry lecturers
