

Animal Diversity Web Quest

Today we are going to learn about different types of animals. There are two main groups of animals:

1. Invertebrates
2. Vertebrates

Examples of invertebrate animals are insects, snails, clams, worms, spiders, lobsters and crabs. These animals DO NOT have a spinal column.

We are going to study vertebrate animals. Examples of vertebrate animals are mammals, birds, reptiles, amphibians and fish. These animals have a spinal column made of many bones.

Directions:

1. Go to the following website:
<http://www.biokids.umich.edu/critters/>
2. Click on mammals
3. Answer these questions:

What are four important characteristics of mammals?
Characteristics are things that animals have in or on their bodies.

Are there any mammals that can lay eggs? Yes No

What does the word "warm-blooded" mean?

Gregory Fricchione, 2011-12 Reconciling the scientific principles of medicine with the love essential for meaningful care is not an easy task but it is one that Gregory L Fricchione performs masterfully in *Compassion and Healing in Medicine and Society* At the core of this book is a thought provoking analysis of the relationship between evolutionary science and neuroscience Fricchione theorizes that the cries for attachment made by seriously ill patients reflect an underlying evolutionary tenet called the separation challenge attachment solution process The pleadings of patients he explains are verbal expressions of the history of evolution itself By exploring the roots of a patient's attachment needs we come face to face with a critical component of natural selection and the evolutionary process Medicine engages with the separation challenge attachment solution process on many levels of scientific knowledge and human meaning and healing Fricchione applies these concepts to medical care and encourages physicians to fully understand them so they can better treat their patients Compassionate humanistic care promotes physical emotional and spiritual healing precisely because it is consonant with how life the brain and humanity have evolved It is therefore not a luxury of modern medical care but an essential part of it Fricchione advocates an attachment based medical system one in which physicians evaluate stress and resiliency and prescribe an integrative treatment plan for the whole person designed to accentuate the propensity to health There is a wisdom or perennial philosophy based on compassionate love that Fricchione stresses the medical community must take advantage of in designing future health care and society must appreciate as it faces its separation challenges *Intensive Animal Farming - A Cost-Effective Tactic* Muhammad Abubakar, Shumaila Manzoor, 2023-10-11 Livestock farming supports livelihood and provides food security It is the fastest growing sector of the agriculture economy This book is about using modern technology to increase yields income and ultimately food security It is organized into three sections on livestock and poultry farming fish farming and innovations and advances in technology Campbell Biology Australian and New Zealand Edition Jane B. Agroecological Practices For Sustainable Agriculture: Principles, Applications, And Making The Transition Alexander Wezel, 2017-06-19. Good agroecological practices are indispensable for the development of sustainable agriculture. In this book, principles, diversity and applications of agroecological practices for a range of systems are presented, transforming scientific research and participatory knowledge of production into practical application. It illustrates a broad range of research and teaching being used within the farming community to demonstrate best practice and current state of play within the field. Agroecological methods used in crop

farming grass based livestock farming fish production and other complex farming systems are discussed Conclusions are drawn from studies to provide an outlook on future trends of agroecological practices and on policies supporting implementation Due to emphasis on real life application it is relevant not only to students of the agricultural sciences and public policy but also to researchers stakeholders and policy makers involved in the development of sustainable agriculture
