Availability, Reliability and Security Florian Skopik, Vincent Naessens, Bjorn De Sutter, 2025-08-08 This two volume set LNCS 15998 15999 constitutes the proceedings of the ARES 2025 EU Projects Symposium Workshops held under the umbrella of the 20th International conference on Availability Reliability and Security ARES 2025 which took place in Ghent Belgium during August 11 14 2025 The 42 full papers presented in this book were carefully reviewed and selected from 92 submissions They contain papers of the following workshops Part I 5th International Workshop on Advances on Privacy Preserving Technologies and Solutions IWAPS 2025 6th Workshop on Security Privacy and Identity Management in the Cloud SECPID 2025 First International Workshop on Secure Trustworthy and Robust AI STRAI 2025 5th International Workshop on Security and Privacy in Intelligent Infrastructures SP2I 2025 Part II 5th workshop on Education Training and Awareness in Cybersecurity ETACS 2025 5th International Workshop on Security Testing and Monitoring STAM 2025 8th International Workshop on Emerging Network Security ENS 2025 *Teaching Cybersecurity* Daniel Shoemaker, Ken Sigler, Tamara Shoemaker, 2023-02-15 Let s be realistic here Ordinary K 12 educators don t know what cybersecurity is and could probably care less about incorporating it into their lesson plans Yet teaching cybersecurity is a critical national priority So this book aims to cut through the usual roadblocks of confusing technical jargon and industry stovepipes and give you the classroom teacher a unified understanding of what must be taught That advice is based on a single authoritative definition of the field In 2017 the three societies that write the standards for computing software engineering and information systems came together to define a single model of the field of cybersecurity It is based on eight building blocks That definition is presented here However we also understand that secondary school teachers are not experts in arcane subjects like software component human or societal security Therefore this book explains cybersecurity through a simple story rather than diving into execution details Tom a high school teacher and Lucy a middle school teacher are tasked by their district to develop a cybersecurity course for students in their respective schools They are aided in this by the Doc an odd fellow but an expert in the field Together they work their way through the content of each topic area helping each other to understand what the

student at each level in the educational process has to learn The explanations are simple easy to understand and geared toward the teaching aspect rather than the actual performance of cybersecurity work Each chapter is a self contained explanation of the cybersecurity content in that area geared to teaching both middle and high school audiences The eight component areas are standalone in that they can be taught separately But the real value lies in the comprehensive but easy to understand picture that the reader will get of a complicated field
