Covello, Joshua Menkes, J.L. Mumpower, 2012-12-06 Public attention has focused in recent years on an array of technological risks to health safety and the environment At the same time responsibilities for technological risk assessment evaluation and management have grown in both the public and private sectors because of a perceived need to anticipate prevent or reduce the risks inherent in modern society In attempting to meet these responsibilities legislative judicial regulatory and private sector institutions have had to deal with the extraordinarily complex problems of assessing and balancing risks costs and benefits The need to help society cope with technological risks has given rise to a new intellectual endeavor the social and behavioral study of issues in risk evaluation and risk management The scope and complexity of these analyses require a high degree of cooperative effort on the part of specialists from many fields Analyzing social and behavioral issues requires the efforts of political scientists sociologists decision analysts management scientists economists psychologists philosophers and

policy analysts among others **Approaches to Acceptable Risk** Baruch Fischhoff,U.S. Nuclear Regulatory Commission,1980 **Technological Risk Assessment** P.F. Ricci,L.A. Sagan,C.G. Whipple,2012-12-06 Proceedings of the NATO Advanced Study Institute on Technological Risk Assessment Erice Sicily Italy May 20 31 1981 *Risk/Benefit Analysis in Water Resources Planning and Management* Yacov Haimes,2013-06-29 Ronald M North President Universities Council on Water Resources People sense intuitively that the world in which we live is not free of risk Every decision every action even the refusal to either act or decide involves some element of risk Perhaps because we accept relatively low levels of risk in our daily activities we tend to minimize the existence of risk and thereby fail to include risk assessment in those decisions and actions which could be improved through a risk assessment process However our casual approach to risk assessment seems to stem largely from the difficulties inherent in measuring risk rather than from any lack of cognizance of the existence of risk This conclusion is evidenced by the many statements in official documents relating to planning and evaluation which suggest that risk assessments should be conducted but do not provide the mechanism for such assessments nor do they encourage their consideration in the decision making process This conference on Risk Benefit Analysis in Water Resources Planning and Management is notable because it attempts to identify and evaluate the mechanisms available for risk assessment which might be useful in water resources planning and management efforts These proceedings bring together the thoughts of professional persons who have struggled with the problems of risk assessment and who have contributed to the refinement of both theoretical and pragmatic solutions for the improvement of risk assessment processes
