Acceptance Of Interactive Whiteboards By Italian Mathematics:

Interactive Whiteboards for Education: Theory, Research and Practice Thomas, Michael, Schmid, Euline Cutrim, 2010-02-28 This book contributed to the debate about the importance of research based studies in the field of educational policy making in general and learning technologies particularly the use of interactive whiteboards for education Provided by publisher , Exploring Intersectionality and Women in STEM Balderas, Luz Idalia, Tiwari, Sanju, Verdugo, Elizabeth, Maestre-Gongora, Gina Paola, Ortiz-Rodriguez, Fernando, 2024-03-18 A persistent challenge infects the vast setting of academic pursuits the enduring gender gap in science technology engineering and mathematics STEM Despite incremental progress women continue to face formidable obstacles ranging from entrenched stereotypes to institutional oversights The urgency of addressing this issue cannot be overstated as evidenced by UNESCO s revelation that less than 30% of the world s researchers and scientists are women Exploring Intersectionality and Women in STEM seizes this pivotal moment unraveling the complexities of the gender gap in STEM and daring to propose transformative solutions This book is not just an analysis of disparities it is a dynamic and initiative taking guide for researchers STEM students and practitioners By immersing oneself in its pages the reader becomes an agent of change armed with insights into life sciences physical sciences engineering mathematics computer science and health sciences Through a transdisciplinary lens the book illuminates a path toward a more inclusive and equitable future **The Mathematics Teacher in the Digital Era** Alison Clark-Wilson, Ornella Robutti, Nathalie Sinclair, 2013-12-08 This volume addresses the key issue of the initial education and lifelong professional learning of teachers of mathematics to enable them to realize the affordances of educational technology for mathematics With invited contributions from leading scholars in the field this volume contains a blend of research articles and descriptive texts In the opening chapter John Mason invites the reader to engage in a number of mathematics tasks that highlight important features of technology mediated mathematical activity This is followed by three main sections An overview of current practices in teachers use of digital technologies in the classroom and explorations of the possibilities for developing more effective practices drawing on a range of research perspectives including grounded theory enactivism and Valsiner s zone theory A set of chapters that share many common constructs such as instrumental orchestration instrumental distance and double instrumental genesis and research settings that have emerged from the French research community but have also been taken up by other colleagues Meta level considerations of research in the domain by contrasting different approaches and proposing connecting or uniting elements Handbook of Research on International Approaches and Practices for Gamifying Mathematics Huertas-Abril, Cristina A., Fernández-Ahumada, Elvira, Adamuz-Povedano, Natividad, 2022-05-13 Game based resources provide opportunities to consolidate and develop a greater knowledge and understanding of both mathematical concepts and numeracy skills which present opportunities and challenges for both teachers and learners when engaging with subject content For learners for whom the language of instruction is not their first

or main language this can present challenges and barriers to their progress This requires teachers to reconsider and adapt their teaching strategies to ensure the needs of these learners are fully addressed thereby promoting inclusion and inclusive practices The Handbook of Research on International Approaches and Practices for Gamifying Mathematics provides relevant theoretical frameworks and the latest empirical research findings in teaching and learning mathematics in bilingual plurilingual education by using active methodologies specifically gamification and game based learning and teaching Covering a wide range of topics such as e safety bilingual education and multimodal mathematics this major reference work is ideal for policymakers researchers academicians practitioners scholars instructors and students **Third Symposium**

Proceedings. New Ways of Teaching and Learning Janina Morska, Alan Rogerson, This volume contains the papers presented at the Third International Symposium on New Ways of Teaching Learning held from August 6 10 2024 at the Aemilia Hotel Bologna Italy The Conference was organized by The Mathematics Education for the Future Project an international educational project founded in 1986 and dedicated to innovation in mathematics statistics science and computer education world wide **Mathematical Competencies in the Digital Era** Uffe Thomas Jankvist, Eirini Geraniou, 2023-02-20 This book focuses on the potential interplay between two distinct yet related paradigm shifts in mathematics education drawing on the notion of networking of theories through illustrative case studies from the Danish educational system and beyond The first paradigm shift is the massive introduction of digital technology in the teaching and learning of the subject the second is a shift from the traditional focusing on mastering of skills and knowledge to being concerned with the possession and development of mathematical competencies This book builds on the Danish KOM Competencies and the Learning of Mathematics project which sources its description of mathematical mastery primarily on the notion of a mathematical competency rather than on lists of topics concepts and results This allows for an overarching framework which captures the perspectives of mathematics teaching and learning at whichever educational level While the KOM framework does not in detail address the role of digital technologies in relation to its description of different types of mathematical competencies etc the chapters of this book set out to do exactly this while in the process also drawing on a selection of other theoretical constructs and frameworks from mathematics education research Starting with introductory chapters by key researchers in the area the book brings forth chapters for each of the KOM framework's eight mathematical competencies authored by Nordic researchers in combination with international scholars The KOM framework also operates with three types of overview and judgement which are specifically addressed in relation to the role of digital technologies in the third part of the book The fourth and final part of the book broadens the scene and provides chapters of a more perspective nature in relation to mathematical competencies in the digital era The book's preface is by Susanne Prediger
