MEMORANDUM FOR THE RECORD

REFERENCE: Contract [] PAR 203, Rapid Access Printer

1. Under PAR 203 a study for a Photographic Reproduction System that will yield high quality positive images, with rapid and convenient handling in office-type surroundings was conducted. The study was to investigate commercially available continuous tone, dry or ~~semi~~-dry printing systems with the view of designing and fabricating a rapid access printer.

2. A final report on Phase I, PAR 203, has been submitted by [] which deals specifically with the study of systems and not with the fabrication of equipment. The Dry Photo Systems studied under Phase I were limited to Kalvar and Diazo type films. It was recommended by [] that a prototype rapid access printing system be designed, fabricated, and tested utilizing technifax H 5-100 Diazo film. There are also other methods and systems under research, which have definite possibilities for rapid access printing, such as [] research program on a dry silver process and the [] sepratron concept.

3. The recommendation to design a rapid access printer which uses Technifax H 5 - 100 Diazo film is undesirable as other systems presently being researched appear to have greater possibilities in this area. It is, therefore, recommended that the [] recommendation be rejected and that further investigation into [] dry silver process and [] sepratron system be conducted to determine their application to rapid access printing.
