

Lesson VI. THE ACCOUNTING EQUATION

A. Introduction

The Accounting Equation is $\text{Asset} = \text{Liabilities} + \text{Equity}$

1. That **Assets** are resources owned by the business.
2. That **Liabilities** are obligations by the business.
3. That **Equity** is the residual interest of the owner of the business. Meaning, any assets left after paying liabilities is the right of the owner of the business.

There are four elements that affect equity:

1. Investment – refers to the initial and additional cash or other assets invested by the owner of the business.
2. Withdrawal – withdrawing of cash or other assets from the business for the owner's personal use.
3. Revenue or Income - is the increase in resources resulting from performance of service or selling of goods. Income increases equity.

Examples of Income:

A. Service Business

- | | |
|------------------------|------------------------|
| 1. Service Income | 4. Tuition Fees |
| 2. Rent Income | 5. Consultation Income |
| 3. Professional Income | |

B. Merchandising & Manufacturing Business

1. Sales

4. Expenses - is the decrease in resources resulting from the operations of business. Expenses decreases Equity in the accounting equation.

Examples of Expenses

- | | |
|----------------------|-------------------------|
| 1. Salaries Expense | 5. Interest Expense |
| 2. Supplies Expense | 6. Advertising Expense |
| 3. Utilities Expense | 7. Depreciation Expense |
| 4. Insurance Expense | 8. Rent Expense |

4. That for every transaction, the accounting equation should always be balanced

Elements of Accounting Equation

A. Assets – are resources that an entity owns in order to derive future benefits. These are used by the company in its normal operations such as manufacture of goods or delivery of services. The main feature of these assets is their capability to give benefits to the entity. These benefits are usually in the form of their ability to directly or indirectly increase the flow of cash to the entity or a reduction of its outflows.

Some examples of Assets.

1. Cash – it is the money that we use comprising the bills and the coins that we use in the everyday lives in order to buy the goods that we want and also to avail the services that we need. However, when we do the accounting for Cash, we also consider cash as the money that is deposited in the banks and even undeposited checks from customers.
2. Accounts Receivables - are amounts due from customers arising from credit sales or credit services
3. Inventories are assets held for resale. Normally held for sale of the store in its normal operation
4. Equipment - are long-lived assets which have been acquired for use in operations like delivery trucks, cars.
5. Land and Building
6. Intangible Assets are assets without a physical substance. Examples include franchise and copyright.

B. Liabilities – claims of external parties from the entity. This are the debts and obligations of the company to another entity. They are not always paid in cash but also can be paid on the form of performing services or even give something.

Some examples of Liabilities.

1. **Accounts Payable** are amounts due, or payable to, suppliers for goods purchased on account or for services received on account.
2. **Unearned Revenue or Unearned Income** is cash collected in advance; the liability is the services to be performed or goods to be delivered in the future

C. Equity – or Owner's Equity is the residual interest of the owner from the business. It can be derived by deducting liabilities from assets.

Equity comes from two (2) sources

1. Contributions of Owners in the form of investment of capital
2. Come from the **income** of the business from its normal operation

The Net Income or Net Loss is computed as:

$$\text{Revenues} - \text{Expenses} = \text{Net Income} / (\text{Net Loss})$$
