MARKING GUIDELINE

Accounting AI Paper June 2014 12

Dr James Hazelton and Dr John Dumay

Accounting Al Paper June 2014 12:

The Routledge Companion to Financial Accounting Theory Stewart Jones, 2015-05-22 Financial accounting theory has numerous practical applications and policy implications for instance international accounting standard setters are increasingly relying on theoretical accounting concepts in the creation of new standards and corporate regulators are increasingly turning to various conceptual frameworks of accounting to guide regulation and the interpretation of accounting practices The global financial crisis has also led to a new found appreciation of the social economic and political importance of accounting concepts generally and corporate financial reporting in particular For instance the fundamentals of capital market theory i e market efficiency and measurement theory i e fair value have received widespread public and regulatory attention This comprehensive authoritative volume provides a prestige reference work which offers students academics regulators and practitioners a valuable resource containing the current scholarship and practice in the established field of financial accounting theory

Research Handbook on International Financial Crime Barry Rider, 2015-11-27 A significant proportion of serious crime is economically motivated Almost all financial crimes will be either motivated by greed or the desire to cover up misconduct This Handbook addresses financial crimes such as fraud corruption and money laundering and highlights both the risks presented by these crimes as well as their impact on the economy The contributors cover the practical issues on the topic on a transnational level both in terms of the crimes and the steps taken to control them They place an emphasis on the prevention disruption and control of financial crime They discuss in eight parts the nature and characteristics of economic and financial crime The enterprise of crime business crime the financial sector at risk fraud corruption The proceeds of financial and economic crime and enforcement and control Academics interested in criminology law as well as business and legal studies students will find this book to be an invaluable resource Practitioners including lawyers compliance and risk managements law enforcement officers and policy makers will also find the points raised to be of use

Algorithmic Regulation Karen Yeung, Martin Lodge, 2019 As the power and sophistication of of big data and predictive analytics has continued to expand so too has policy and public concern about the use of algorithms in contemporary life This is hardly surprising given our increasing reliance on algorithms in daily life touching policy sectors from healthcare transport finance consumer retail manufacturing education and employment through to public service provision and the operation of the criminal justice system This has prompted concerns about the need and importance of holding algorithmic power to account yet it is far from clear that existing legal and other oversight mechanisms are up to the task This collection of essays edited by two leading regulatory governance scholars offers a critical exploration of algorithmic regulation understood both as a means for co ordinating and regulating social action and decision making as well as the need for institutional mechanisms through which the power of algorithms and algorithmic systems might themselves be regulated It offers a unique perspective that is likely to become a significant reference point for the ever growing debates about the

power of algorithms in daily life in the worlds of research policy and practice The range of contributors are drawn from a broad range of disciplinary perspectives including law public administration applied philosophy data science and artificial intelligence Taken together they highlight the rise of algorithmic power the potential benefits and risks associated with this power the way in which Sheila Jasanoff's long standing claim that technology is politics has been thrown into sharp relief by the speed and scale at which algorithmic systems are proliferating and the urgent need for wider public debate and engagement of their underlying values and value trade offs the way in which they affect individual and collective decision making and action and effective and legitimate mechanisms by and through which algorithmic power is held to account

The Law on Corporate Governance in Banks Iris H-Y Chiu, Michael McKee, 2015-02-27 Corporate governance in financial institutions has come under the spotlight since the banking crisis in the UK in 2008 9 In many respects the banking business raises unique problems for corporate governance that are not found in other corporate sectors Management Accounting in a Dynamic Environment Cheryl S. McWatters, Jerold L. Zimmerman, 2015-12-22 Whether students pursue a professional career in accounting or in other areas of management they will interact with accounting systems In all organizations managers rely on management accounting systems to provide information to deal with changes in their operating environment This book provides students and managers with an understanding and appreciation of the strengths and limitations of an organization's accounting system and enables them to be intelligent and critical users of the system The text highlights the role of management accounting as an integral part of the organization's strategy and not merely a set of individual concepts and computations An analytical framework for organizational change is used throughout the book to underscore how organizations must adapt to create customer and organizational value This framework provides a way to examine and analyze the organization's accounting system and as a basis for evaluating proposed changes to the system With international examples that bring the current business environment to the forefront problems and cases to promote critical thinking and online support for students and instructors Management Accounting in a Dynamic Environment is no mere introductory textbook It prepares readers to use accounting systems intelligently to achieve organizational success The authors have identified several cases to accompany each chapter in the textbook These are available through Ivey Publishing <https://www.iveycases.com/CaseMateBookDetail.aspx?id=434> Report of the Comptroller of Public Accounts Texas. Comptroller's Office, 1895 A-CSEAR 2015-Proceedings of the 14th Australasian Centre on Social and Environmental Accounting Research Conference Dr James Hazelton and Dr John Dumay, 2015-11-13 The 14th Australasian Centre on Social and Environmental Accounting Research Conference A CSEAR 2015 is being held on 10-11 December 2015 at Macquarie University Sydney Australia The Conference Chair is Dr John Dumay and the Programme Chair is Dr James Hazelton both from Macquarie University ACSEAR provides an opportunity for individuals researching and working in the field of social and environmental accounting in both public and private sectors to come together to exchange ideas and discuss current

research in the field The theme for the conference this year is Partnerships reflecting the belief amongst our community that achieving progress requires partnerships of all types between academics of different disciplines between industry and academia between government and stakeholders and of course between members and professional bodies The keynote speakers for the conference are Charles de Villiers from Auckland University of Technology New Zealand on the topic Theorising the interactions among legitimacy accountability and pro activity in the social sphere Helen Tregidga from Auckland University of Technology New Zealand talking about Corporate chameleons greenwashing and counter narratives Markus J Milne from the School of Business and Law at the University of Canterbury New Zealand on the topic of Crass empiricism and the social construction of corporate environmental performance and Lee D Parker from the School of Accounting RMIT University Melbourne Australia who will address to issue of Accounting for CSR Revisiting the agenda

ACSEAR received 60 abstract submissions After the double blind peer review process 21 academic research papers have been accepted for publication in these conference proceedings These papers represent research from around the world including Australia Brazil China Fiji Iran Italy Japan New Zealand South Africa UK and the USA

Europe's Place in Global Financial Governance after the Crisis Daniel Mügge, 2016-03-31 In the years leading up to the global financial crisis the European Union EU had emerged as a central actor in global financial governance almost rivalling the United States in influence While the USA and the EU continue to dominate financial rule setting in the post crisis world the context in which they do so has changed dramatically Pre crisis ideas about laissez faire regulation have been discarded in favour of more interventionist ones The G20 and the Financial Stability Board have been charged with stronger coordination of global efforts At the same time jurisdictions have re-emphasized the need to get their own regulatory house in order before committing to further global harmonization And through banks failures and massive bail outs the financial sector hitherto a driving force behind the cross border integration of finance has been reconfigured This book asks a straightforward question what have these and other key post crisis trends in global finance done to the position that the European Union occupies in it The contributions to this book analyse the link between financial governance in the European Union and on the global level from diverse theoretical angles and they cover the main issues that will shape the future European role on the global regulatory stage This book was published as a special issue of the Journal of European Public Policy

Forensic Accounting and Fraud Examination Mary-Jo Kranacher, Richard Riley, 2023-12-19 The gold standard in textbooks on forensic accounting fraud detection and deterrence In the newly revised third edition of Forensic Accounting and Fraud Examination a team of renowned educators provides students and professionals alike with a comprehensive introduction to forensic accounting fraud detection and deterrence Adhering to the model curriculum for education in fraud and forensic accounting funded by the US National Institute of Justice this leading textbook offers real world practicality supported by effective learning pedagogies and engaging case studies that bring technical concepts to life Covering every key step of the investigative

process Forensic Accounting and Fraud Examination contains 32 integrated IDEA and Tableau software cases that introduce students to the practical tools accounting professionals use to maximize auditing and analytic capabilities detect fraud and comply with documentation requirements Numerous case summaries The Fraudster s Perspective boxes and detailed discussions of a wide range of accounting issues provide students and practitioners with the tools they ll need to successfully investigate prosecute research and resolve forensic accounting issues and financial fraud The perfect resource for students of forensic accounting and fraud examination as well as practitioners in the field Forensic Accounting and Fraud Examination Third Edition will also prove invaluable for academics and researchers with an interest in the subject ,
