Language @t work ,2005 In recent decades the dramatic development of the new communication and information

technologies especially the World Wide Web has had a major impact on society. Undoubtedly the Internet has become a powerful medium of communication and is regarded as a limitless resource by professionals and researchers in many areas.

New developments in ESP teaching and learning research Cédric Sarré, Shona Whyte, 2017-12-05 In this collective volume we seek to bridge gaps between research and practice in the teaching and learning of English for Specific Purposes (ESP) with a set of strong research-based contributions drawing on a wide range of ESP contexts. It offers new theoretical and pedagogical insights for ESP practitioners and researchers alike, going beyond descriptions of ESP situations and programmes to bring in sound research design and data analysis which are firmly anchored in previous ESP research. The nine papers in this collection cover a variety of ESP domains from medicine, technical science and engineering to social sciences and the humanities in order to encapsulate current trends and new developments in ESP teaching and learning research in Europe.

Language Learning Online: Towards Best Practice Uschi Felix, 2003-01-01 This important and accessible book identifies the key elements in the quest for best practice in online language teaching. The authors, all of them international experts who have made significant contributions to the debate about how to exploit the new technologies, consider online language teaching from three crucial perspectives: design, tools and pedagogy. Their recommendations are such that they can actually be realised in spite of the limitations of today's educational environments. The book demonstrates that the new technologies offer far greater potential for authentic encounters and constructivist learning than even the best classroom simulations. That automated exercise and feedback structures can be individualised and meaningful and that if we have to teach fully by distance these ventures no longer need to represent impoverished versions of live classes but can engender a strong sense of community. To achieve this we need to understand what elements constitute good design both in technical and pedagogical terms, to think seriously about providing the best feedback possible and to have the courage to take the risks associated with letting go of traditional learner-teacher relationships.
