Development and Review for Democratic Citizenship and Human Rights Education Tibbitts, Felisa, Council of Europe, 2016-03-01 Education for democratic citizenship and human rights education are vital for peaceful sustainable and inclusive societies based on respect for the human rights of every person Effective teaching and learning processes require well trained teachers positive learning environments and high quality learning materials This is underpinned by education policy including curriculum development and review which is the main focus of this book The strengthening of education policies in the fields of education for democratic citizenship and human rights lies at the very heart of the efforts of the Council of Europe the United Nations Educational Scientific and Cultural Organization the Office for Democratic Institutions and Human Rights of the Organization for Security and Co operation in Europe and the Organization of American States

These organisations have jointly produced this publication in order to support states commitment to fostering citizenship and human rights education and improving access to quality education for all

The Lives of George Frideric Handel David Hunter,2015 This book aims not only to re examine the life of the great composer Handel but also to explore the very concepts of biography With an introduction bibliography and index Figures Tables

The Modernist City James Holston,1989-09-08 The utopian design and organization of Bras lia the modernist new capital of Brazil were meant to transform Brazilian society In this sophisticated pioneering study of Bras lia from its inception in 1957 to the present James Holston analyzes this attempt to change society by building a new kind of city and the ways in which the paradoxes of constructing an imagined future subvert its utopian premises Integrating anthropology with methods of analysis from architecture urban studies social history and critical theory Holston presents a critique of modernism based on a powerfully innovative ethnography of the city

At this Time and in this Place David S. Cunningham,2016 This volume champions vocation and calling as key elements of undergraduate education It offers a historical and theoretical account of vocational reflection and discernment as well as suggesting how these endeavours can be implemented through specific educational practices Against the backdrop of the current national conversation about the purposes of higher education it argues that the undergraduate years can provide a certain amount of relatively unfettered time and a free and ordered space in which students can consider their callings

Optical Diagnostics for Flow Processes P. Buchhave,L. Lading,G. Wigley,2013-11-11 The origin of optical methods for fluid flow investigations appears to be nontraceable This is no matter for surprise After all seeing provides the most direct and common way for humans to learn about their environment But at the same time some of the most sophisticated methods for doing measurements in fluids are also based on light and often laser light A very large amount of material has been published in this area over the last two decades Why then another publication Well the field is still in a state of rapid development It is

characterised by the use of results and methods developed within very different areas like optical physics spectroscopy communication systems electronics and computer science mechanical engineering chemical engineering and of course fluid dynamics We are not aware of a book containing both introductory and more advanced material that covers the same material as presented here The book is the result of a compilation and expansion of material presented at a summer school on Optical Diagnostics for Flow Processes held at RiSO National Laboratory and the Technical University of Denmark in September 1993 The aim of the course was to provide a solid background for understanding evaluating and using modern optical diagnostic methods addressing Ph D students and researchers active in areas of fluid flow research The disciplines represented by the participants ranged from atmospheric fluid dynamics to biomedicine
