Since the seventeenth century our ideas of scientific authorship have expanded and changed dramatically In this ambitious
volume of new work Mario Biagioli and Peter Galison have brought together historians of science literary historians and
historians of the book Together they track the changing nature and identity of the author in science both historically and
conceptually from the emergence of scientific academies in the age of Galileo to concerns with large scale multiauthorship
and intellectual property rights in the age of cloning labs and pharmaceutical giants How for example do we decide whether
a chemical compound is discovered or invented What does it mean to patent genetic material Documenting the emergence of
authorship in the late medieval period authorship s limits and its fragmentation Scientific Authorship offers a collective
