Character Formation Eric Yang,2024-08-22 This volume examines the role and relevance of exemplars and the practice of imitation in character development and formation While the role of exemplars and imitation in spiritual and moral formation has been an integral part of many religious and wisdom traditions in recent times there has been limited theological and philosophical investigation into it and a dearth of interdisciplinary discussion The book brings together relevant research and insights from leading experts within philosophy psychology and theology with a slight emphasis on Christian approaches to exemplars and imitation especially given the reflection on these themes throughout the history of the Christian intellectual and mystical tradition Many of the contributions display an interdisciplinary approach into these issues hence this volume will be of interest to philosophers psychologists theologians and others who work in moral psychology and character formation

in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes; at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety, as well as support students' use of self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning, as well as limiting their autonomy and creativity. There are also indications of students becoming more performance-oriented as opposed to learning-oriented when being provided with explicit assessment criteria. Taken together, it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria, and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited, and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book, we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation, and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.
