

LIFE SCIENCES GRADE 12
PRACTICAL TASK TERM 1 2023
DNA: THE CODE OF LIFE
DURATION: 45 Minutes
Total
30
INSTRUCTIONS AND INFORMATION

Read the following instructions carefully before answering the questions.

1. This is a formal SBA task and **MUST** be done **under supervised conditions** in the classroom.
2. Each learner completes this task **on his/her own** (under test conditions).
3. Present your answers as per the instructions of each question.
4. Draw all diagrams in pencil and label in blue ink.
5. The diagrams in this task may NOT be drawn to scale.

BACKGROUND INFORMATION

There are two types of nucleic acids in all living organisms – DNA (deoxyribonucleic acid) and RNA (ribonucleic acid). Together these form the basis of all life on earth.

They consist of monomers (building blocks) called nucleotides. In 1952 the British chemist, Rosalind Franklin and her assistant Maurice Wilkins researched the structure of DNA using X-ray diffraction images. Watson and Crick did independent research on DNA. Upon seeing Franklin's images, they proposed a 3-D double helix model of DNA in 1953. In 1962 Watson and Crick received the Nobel Prize for the discovery of the structure of DNA, and Wilkins received an award for his X-ray photography. Franklin had died of cancer.

Diagram 1 below illustrates some of the components of nucleic acids.

QUESTION 1

2014 Life Sciences Practical Number 2 Memorandum

Kimberly Allen

2014 Life Sciences Practical Number 2 Memorandum:

Teaching Political Science: A Practical Guide for Instructors Amanda M. Rosen, 2024-08-01 This book applies the existing literature in the scholarship of teaching and learning to political science advising discipline specific tips approaches and strategies to put immediately into practice Keeping in mind the pace of an academic career it also challenges the widely held misconception that being a good teacher requires a huge time investment This book is meant for three core audiences graduate students taking a course on teaching political science or about to embark on their first teaching experience newly minted PhDs facing their first academic post and trying to figure out how to balance all of their new responsibilities and veteran instructors looking to prepare a new course or revise an existing one *Digital Phenotyping and Mobile Sensing* Christian Montag, Harald Baumeister, 2022-07-22 This book offers a snapshot of cutting edge applications of digital phenotyping and mobile sensing for studying human behavior and planning innovative e healthcare interventions The respective chapters written by authoritative researchers cover both theoretical perspectives and good scientific and professional practices related to the use and development of these technologies They share novel insights into established applications of mobile sensing such as predicting personality or mental and behavioral health on the basis of smartphone usage patterns and highlight emerging trends such as the use of machine learning big data and deep learning approaches and the combination of mobile sensing with AI and expert systems Important issues relating to privacy and ethics are analyzed together with selected case studies This thoroughly revised and extended second edition provides researchers and professionals with extensive information on the latest developments in the field of digital phenotyping and mobile sensing It gives a special emphasis to trends in diagnostics systems and AI applications suggesting important future directions for research in public health and social sciences **Artificial General Intelligence** Tom Everitt, Ben Goertzel, Alexey Potapov, 2017-08-06 This book constitutes the proceedings of the 10th International Conference on Artificial General Intelligence AGI 2017 held in Melbourne VIC Australia in August 2017 The 24 regular papers presented in this book together with 1 short paper were carefully reviewed and selected from 35 submissions They cover topics such as architectures mathematical foundations algorithms safety understanding human cognition and philosophy *Data Management* Margaret E. Henderson, 2016-10-25 Libraries organize information and data is information so it is natural that librarians should help people who need to find organize use or store data Organizations need evidence for decision making data provides that evidence Inventors and creators build upon data collected by others All around us people need data Librarians can help increase the relevance of their library to the research and education mission of their institution by learning more about data and how to manage it Data Management will guide readers through Understanding data management basics and best practices Using the reference interview to help with data management Writing data management plans for grants Starting and growing a data management service Finding collaborators inside and outside the library Collecting and using data in

different disciplines **The Effects of Noise on Aquatic Life** Arthur N. Popper, Joseph A. Sisneros, Anthony D. Hawkins, Frank Thomsen, 2024-10-03 In this landmark new work the major authorities in the field from around the world present a wealth of research data coverage of regulatory issues and thinking about the effects of man made noise on marine mammals turtles amphibians fishes and invertebrates The various themes of the book were chosen to cover the wide range of basic and cutting edge information on this topic They include the hearing abilities of aquatic animals communication by means of underwater sound the description of aquatic soundscapes different sound sources and their characteristics the effects of sound on behavior and assessing mitigating and monitoring the effects of aquatic noise Emphasis is on the cross fertilization of ideas and findings across species and noise sources With over 140 contributions from leading researchers the sources of underwater sound and their effects are discussed in detail **Strategies for Team Science Success** Kara L. Hall, Amanda L. Vogel, Robert T. Croyle, 2019-11-13 Collaborations that integrate diverse perspectives are critical to addressing many of our complex scientific and societal problems Yet those engaged in cross disciplinary team science often face institutional barriers and collaborative challenges Strategies for Team Science Success offers readers a comprehensive set of actionable strategies for reducing barriers and overcoming challenges and includes practical guidance for how to implement effective team science practices More than 100 experts including scientists administrators and funders from a wide range of disciplines and professions explain evidence based principles highlight state of the art strategies tools and resources and share first person accounts of how they've applied them in their own successful team science initiatives While many examples draw from cross disciplinary team science initiatives in the health domain the handbook is designed to be useful across all areas of science Strategies for Team Science Success will inspire and enable readers to embrace cross disciplinary team science by articulating its value for accelerating scientific progress and by providing practical strategies for success Scientists administrators funders and others engaged in team science will also leave equipped to develop new policies and practices needed to keep pace in our rapidly changing scientific landscape Scholars across the Science of Team Science SciTS management organizational behavioral and social sciences public health philosophy and information technology among other areas of scholarship will find inspiration for new research directions to continue advancing cross disciplinary team science [Federal Register](#), 2014 **Effective Monitoring to Evaluate Ecological Restoration in the Gulf of Mexico** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Water Science and Technology Board, Ocean Studies Board, Committee on Effective Approaches for Monitoring and Assessing Gulf of Mexico Restoration Activities, 2017-03-16 Gulf Coast communities and natural resources suffered extensive direct and indirect damage as a result of the largest accidental oil spill in US history referred to as the Deepwater Horizon DWH oil spill Notably natural resources affected by this major spill include wetlands coastal beaches and barrier islands coastal and marine wildlife seagrass beds oyster reefs commercial fisheries deep benthos and coral reefs among other habitats and

species Losses include an estimated 20% reduction in commercial fishery landings across the Gulf of Mexico and damage to as much as 1 100 linear miles of coastal salt marsh wetlands This historic spill is being followed by a restoration effort unparalleled in complexity and magnitude in U S history Legal settlements in the wake of DWH led to the establishment of a set of programs tasked with administering and supporting DWH related restoration in the Gulf of Mexico In order to ensure that restoration goals are met and money is well spent restoration monitoring and evaluation should be an integral part of those programs However evaluations of past restoration efforts have shown that monitoring is often inadequate or even absent Effective Monitoring to Evaluate Ecological Restoration in the Gulf of Mexico identifies best practices for monitoring and evaluating restoration activities to improve the performance of restoration programs and increase the effectiveness and longevity of restoration projects This report provides general guidance for restoration monitoring assessment and synthesis that can be applied to most ecological restoration supported by these major programs given their similarities in restoration goals It also offers specific guidance for a subset of habitats and taxa to be restored in the Gulf including oyster reefs tidal wetlands and seagrass habitats as well as a variety of birds sea turtles and marine mammals

Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond

It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate. This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics. Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers, the quality of careers advice in schools and the importance of practical science in schools.

The Captivating World of Kindle Books: A Thorough Guide Revealing the Pros of Kindle Books: A World of Convenience and Versatility E-book books, with their inherent mobility and ease of access, have freed readers from the constraints of hardcopy books. Gone are the days of carrying bulky novels or carefully searching for specific titles in bookstores.
