Nothing Personal? Nick Gill, 2016-02-23 In this groundbreaking new study Nick Gill provides a conceptually innovative account of the ways in which indifference to the desperation and hardship faced by thousands of migrants fleeing persecution and exploitation comes about Features original unpublished empirical material from four Economic and Social Research Council ESRC funded projects Challenges the consensus that border controls are necessary or desirable in contemporary society Demonstrates how immigration decision makers are immersed in a suffocating web of institutionalized processes that greatly hinder their objectivity and limit their access to alternative perspectives Theoretically informed throughout drawing on the work of a range of social theorists including Max Weber Zygmunt Bauman Emmanuel Levinas and Georg Simmel

The Geography of South Africa Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South **Rethinking Urbanism** Garth Myers, 2020-06-03 This book provides new insights into popular understandings of urbanism by using a wide range of case studies from lesser studied cities across the Global South and Global North to present evidence for the need to reconstruct our understanding of who and what makes urban environments Myers explores the global hierarchy of cities the

criteria for positioning within these hierarchies and the successes of various policymaking approaches designed specifically to boost a city's ranking. Engaging heavily with postcolonial studies and Global South thinking, he shows how cities construct one another's spaces and calls for a new understanding of planetary urbanism that moves beyond Western-centric perspectives.

The Routledge Research Companion to Geographies of Sex and Sexualities Gavin Brown, Kath Browne, 2016-05-20 Comprehensive and authoritative, this state-of-the-art review both charts and develops the rich sub-discipline of geographies of sexualities, exploring sex, gender, sexuality, and sexual practices. Emerging from the desire to examine differences and exclusions as a key aspect of human geographies, these geographies have engaged with heterosexual and queer, lesbian, gay, bi, and trans lives. Developing thinking in this area, geographers and other social scientists have illustrated the centrality of place, space, and other spatial relationships in reconstituting sexual practices, representations, desires, as well as sexed bodies and lives. This book reviews the current state of the field and offers new insights from authors located on five continents. In doing so, the book seeks to draw on and influence core debates in this field, as well as disrupt the Anglo-American hegemony in studies of sexualities, sexes, and geographies. This volume is the definitive collection in the area, bringing together many international leaders in the field alongside scholars that are well established outside the Anglophone academy and many emerging talents who will lead the field in the decades to come.

China's Socialist Rule of Law Reforms Under Xi Jinping John Garrick, Yan Chang Bennett, 2016-01-29 Under the direction of the Communist Party of China (CPC), key legal challenges have been identified which will shape the modernization of China's legal and administrative institutions. An increasingly complex set of legal actors now seek to influence this development, including securities regulators, bankers, accountants, lawyers, local-level mediators, and some of China's newly rich. Whilst the rising middle class wants to voice its interests and concerns, the CPC strives to maintain its leading role. This book provides a critical appraisal of China's deepening socialist rule of law and looks ahead to the implications of the domestic reforms for the international legal domain. With contributions from leading Chinese law specialists, it draws on specific illustrations from judicial reform, constitutional law, procedural law, anti-corruption, property law, and urban development, socio-economic dispute resolution, and Chinese macro-economics. The book questions how China's domestic law reforms will impact international legal systems and how international law can be used in managing key regional and bilateral relationships and in dispute resolution, such as in the South China Sea and international trade. Assessing the state and direction of domestic law reform and including debates around the legal implications of some of China's most pressing foreign policy challenges today, this volume will be of huge interest to students, scholars, and practitioners with an interest in Asia law, Chinese law, international law, comparative law, and law reform.
