2014 Grade 1economics Paper 2 Memorandum

Aida A. Hozic, Jacqui True

2014 Grade 1 economics Paper 2 Memorandum:

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics

Scandalous Economics Aida A. Hozic, Jacqui True, 2016 This book is about the neglect of gender and race in explanations of the Global Financial Crisis It is also about the sexual scandals and gendered austerity policies that have relegated public debate and the crisis itself We need to look at the activities and the privileges of the advantaged the TED women of the crisis as much as the victimization of the disadvantaged to fully grasp the interplay between gender and economy in this age of restoration

Overripe Economy Alan Nasser, 2018-06-20 From industrialisation to the present day Overripe Economy is a genealogy of the emergence of a finance ridden authoritarian austerity plagued American capitalism This panoramic political economic history of the country surveys the ruthlessly competitive capitalism of the nineteenth century the maturation of industrial capitalism in the 1920s the rise and fall of capitalism s Golden Age and the ensuing decline towards the modern era Alan Nasser shows why the emergence of the persistent austerity of financialised neoliberal capitalism is the natural outcome of mature capitalism s evolution revealing both the key structural and political vulnerabilities of capitalism itself and points towards the kind of system that can transcend it At the centre of the argument is capitalism s ultimatum either a new normal of persistent austerity declining democracy and a privatised state or a polity and

economy characterised by an economic democracy that can ensure both higher wages and a shorter working week **The Collapse of Venezuela** Francisco Rodríguez, 2025-03-15 The Collapse of Venezuela documents Venezuela's economic implosion as politicians adopted strategies that severely harmed the economy in their struggle for power Between 2012 and 2020 Venezuela suffered the largest economic contraction ever documented outside of wartime This collapse was caused not just by the failure of an economic model but also the deeper failure of its political system to manage the conflicts inherent to a polarized society The Collapse of Venezuela argues that when the stakes of power are high politicians have an incentive to adopt political strategies that directly harm the economy Author Francisco Rodríguez describes these scorched earth strategies and shows how politicians used these methods to target the Venezuelan economy in their fight for power Ultimately the conflicting sides have trapped the economy in a catastrophic stalemate that has destroyed the country's living standards and turned the economy into a political battlefield By charting Venezuela's experience with scorched earth politics Rodríguez reveals an essential cautionary tale for other democracies around the globe **Microeconomics** Samuel Bowles, Simon D. Halliday, 2022 The authors bring into the classroom the ideas that today's researchers and policy makers use including behavioral economics game theory and incomplete contracts Modern microeconomics is applied to pressing issues that students care about inequality climate change and innovation and illustrated with empirical case studies
