The analysis and prediction of those processes and their feedbacks with the other systems of the biosphere land and ocean from the viewpoints of both atmospheric science and dynamics thermodynamics can improve our knowledge and have a great impact on society. The main aim of this Special Issue was to gather observational theoretical and modeling studies on the dynamics of the atmosphere and the climate system as well as on their predictability at different spatiotemporal scales. **The Cultivator & Country**

Gentleman, 1877 *A River Flows Through It* Selina Ho, 2020-12-17 *A River Flows Through It* A Comparative Study of Transboundary Water Disputes and Cooperation in Asia explores water disputes in Asia and addresses the question of how states sharing a river system can be incentivized to cooperate. Water scarcity is a major environmental societal and economic problem around the world. Increasing demand for water as a result of rapid economic development high population growth and density has depleted the world's water resources leading to floods droughts environmental disasters and societal displacement. Shared river basins are therefore often a source of tension and conflict between states. In regions where relations between countries have historically been conflictual scarce river water resources have exacerbated tensions and have even sparked wars. Yet more often than not states sharing a river basin are able to come to some form of agreement whether they are far reaching ones such as water sharing agreements or those that are more limited such as the sharing of hydrological data. Why do riparian states cooperate especially when power asymmetries between upstream and downstream countries are characteristic of transboundary river basins? How do non state actors affect the management of international rivers? What are the conditions that facilitate or hinder cooperation? This book wrestles with these questions by exploring water disputes and cooperation in the major river systems in Asia and by comparing them with cases in Africa Europe and the United States. This book will be of great value to scholars students and policymakers interested in transboundary water disputes and cooperation hydro diplomacy and river activism. It was originally published as special issues of *Water International*. 〇〇〇〇〇 〇〇〇, 2023-06-28 2020 Ai Hisano Wilbur Owen Sypherd University of Delaware 2016 2020 Hagley Prize **Who's who Among Students in American Universities and Colleges** Henry Pettus Randall, 1973
