Barry Gills, Jamie Morgan

2014 Kzn June Physical Science Paper 1 Memo:

Economics and Climate Emergency Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal *Globalizations* **Plastic Pollution**

François Galgani, Christopher K. Pham, Julia Reisser, 2017-11-15 The presence at sea of large amounts of plastic and microplastics which are sometimes invisible and results from the fragmentation of larger debris requires an in depth knowledge of the nature of ocean debris its transport mechanisms life cycle and effects on the environment This volume provides new insights in the topic of plastic pollution an actual and important problem for the marine environment *The*
