ECRM2014-Proceedings of the 13th European Conference on Research Methodology for Business and Management Studies Dr Martin Rich, Dr Anne Brown, 2014-06-16

Relationship-Rich Education Peter Felten, Leo M. Lambert, 2020-11-03 A mentor advisor or even a friend Making connections in college makes all the difference What single factor makes for an excellent college education As it turns out it's pretty simple human relationships Decades of research demonstrate the transformative potential and the lasting legacies of a relationship rich college experience Critics suggest that to build connections with peers faculty staff and other mentors is expensive and only an option at elite institutions where instructors have the luxury of time with students But in this revelatory book brimming with the voices of students faculty and staff from across the country Peter Felten and Leo M Lambert argue that relationship rich environments can and should exist for all students at all types of institutions In *Relationship Rich Education* Felten and Lambert demonstrate that for relationships to be central in undergraduate education colleges and universities do not require immense resources privileged students or specially qualified faculty and staff All students learn best in an environment characterized by high expectation and high support and all faculty and staff can learn to teach and work in ways that enable relationship based education Emphasizing the centrality of the classroom experience to fostering quality relationships Felten and Lambert focus on students influence in shaping the learning environment for their peers as well as the key difference a single well timed conversation can make in a student's life They also stress that relationship rich education is particularly important for first generation college students who bring significant capacities to college but often face long standing inequities and barriers to attaining their educational aspirations Drawing on nearly 400 interviews with students faculty and staff at 29 higher education institutions across the country *Relationship Rich Education* provides readers with practical advice on how they can develop and sustain powerful relationship based learning in their own contexts Ultimately the book is an invitation and a challenge for faculty administrators and student life staff to move relationships from the periphery to the center of undergraduate education

Disinherited Majority Charles Derber, 2015-11-17 Thomas Piketty's blockbuster 2014 book *Capital in the 21st Century* may prove to be a game changer one of those rare books such as Friedan's *The Feminine Mystique* which helped spark a new feminist movement The world wide flood of commentary suggests Piketty's book has already opened a new conversation not only about inequality but about class capitalism and social justice Inherited wealth is at the heart of *Capital in the 21st Century* and Derber shows how the disinherited majority is likely to affect the future In his new book Derber shows that there are actually two Pikettys different

voices of the author on the 1% inheritance and capitalism itself that create a fascinating and unacknowledged hidden debate and conversation within the book Drawing on Piketty's discussion Derber raises fourteen capital questions with new perspectives on caste and class warfare the Great Recession the decline of the American Dream and the Occupy movement that can guide a new conversation about the past and future of capitalism The Disinherited Majority will catalyse a conversation beyond Piketty already emerging in colleges and universities town halls coffee shops workplaces and political parties and social movements an essential class for all Americans
