2014 Memorandum Pgeography Nov Exam

Daniel Markovits

2014 Memorandum Pgeography Nov Exam:

Sand, Snow, and Stardust Gretchen Heefner, 2025-05-05 A vivid tour of US military efforts to understand survive and command harsh environments worldwide and beyond Deserts the Arctic outer space these extreme environments are often seen as inhospitable places at the edges of our maps But from the 1940s through the 1960s spurred by the diverse and unfamiliar regions the US military had navigated during World War II the United States defense establishment took a keen interest in these places dispatching troops to the Aleutian Islands North Africa the South Pacific and beyond To preserve the country's status as a superpower after the war to pave runways and build bridges engineers had to understand and then conquer dunes permafrost and even the surface of the moon Sand Snow and Stardust explores how the US military generated a new understanding of these environments and attempted to master them intending to cement America's planetary power Operating in these regions depended as much on scientific and cultural knowledge as on military expertise and technology From General George S Patton learning the hard way that the desert is not always hot to the challenges of constructing a scientific research base under the Arctic ice to the sheer implausibility of modeling Martian environments on Earth Gretchen Heefner takes us on a wry expedition into the extremes and introduces us to the people who have shaped our insight into these extraordinary environments Even decades after the first manned space flight plans for human space exploration and extraplanetary colonization are still based on what we know about stark habitats on Earth An entertaining survey of the relationship between environmental history and military might Sand Snow and Stardust also serves as a warning about the further transformation of the planet whether through desertification melting ice caps or attempts to escape it entirely

The Geography of Injustice Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history

The Meritocracy Trap Daniel Markovits, 2019-09-10 This book flips your world upside down Daniel Markovits argues that meritocracy isn't a virtuous efficient system that rewards the best and

brightest Instead it rewards middle class families who can afford huge investments in their children s education Frightening eye opening stuff The Times Books of the Year Even in the midst of runaway economic inequality and dangerous social division it remains an axiom of modern life that meritocracy reigns supreme and promises to open opportunity to all The idea that reward should follow ability and effort is so entrenched in our psyche that even as society divides itself at almost every turn all sides can be heard repeating meritocratic notions Meritocracy cuts to the heart of who we think we are But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that The Meritocracy Trap prosecutes with rare force comprehensive research and devastating persuasion Daniel Markovits a law professor trained in philosophy and economics is better placed than most to puncture one of the dominant ideas of our age Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within as well as how we can take the first steps towards a world that might afford us both prosperity and dignity

Organic Struggle Brian K. Obach,2015-05-08 Organic Struggle analyzes the evolution of the sustainable agriculture movement in the United States and evaluates its achievements and shortcomings It traces the development of organic farming from its roots in the 1940s through its embrace by the 1960s counterculture to its mainstream acceptance and development into a multi billion dollar industry The Middle and Upper Paleolithic Archeology of the Levant and Beyond Yoshihiro Nishiaki,Takeru Akazawa,2017-12-06 This volume is a compilation of results from sessions of the Second International Conference on the Replacement of Neanderthals by Modern Humans which took place between November 30 and December 6 2014 in Hokkaido Japan Similar to the first conference held in 2012 in Tokyo the 2014 conference RNMH2014 aimed to compile the results of the latest multidisciplinary approaches investigating the issues surrounding the replacement of Neanderthals by modern humans The results of the sessions supplemented by off site contributions center on the archeology of the Middle and Upper Paleolithic of the Levant and beyond The first part of this volume presents recent findings from the Levant while the second part focuses on the neighboring regions namely the Caucasus the Zagros and South Asia The 13 chapters in this volume highlight the distinct nature of the cultural occurrences during the Middle and Upper Paleolithic periods of the Levant displaying a continuous development as well as a combination of lithic traditions that may have originated in different regions This syncretism which is an unusual occurrence in the regions discussed in this volume reinforces the importance of the Levant as a region for interpreting the RNMH phenomenon in West Asia **The**

U.S.-China Military Scorecard Eric Heginbotham, Michael Nixon, Forrest E. Morgan, 2015-09-14 A RAND study analyzed trends in the development of Chinese and U S military capabilities in two scenarios centered on Taiwan and the Spratly Islands and multiple types of operations from 1996 to 2017

Justice at Work Marc Doussard, Greg Schrock, 2022-05-17 A pathbreaking look at how progressive policy change for economic justice has swept U S cities In the 2010s cities and counties across the United States witnessed long overdue change as they engaged more than ever before with questions of social economic and racial justice After decades of urban economic restructuring that intensified class divides and institutional and systemic racism dozens of local governments countered the conventional wisdom that cities couldn't address inequality enacting progressive labor market policies from 15 minimum wages to paid sick leave Justice at Work examines the mutually reinforcing roles of economic and racial justice organizing and policy entrepreneurship in building power and support for policy changes Bridging urban social movement and urban politics studies it demonstrates how economic and racial justice coalitions are collectively the critical institution underpinning progressive change It also shows that urban policy change is driven by urban policy entrepreneurs who use public space and the intangible resources of the city to open agenda windows for progressive policy proposals incubated through national networks Through case studies of organizing and policy change efforts in cities including Chicago Seattle and New Orleans around minimum wages targeted hiring paid time off fair scheduling and anti austerity Marc Doussard and Greg Schrock show that the contemporary wave of successful progressive organizing efforts is likely to endure Yet they caution that success is dependent on skillful organizing that builds and sustains power at the grassroots and skillful policy work inside City Hall By promoting justice at and increasingly beyond work these movements hold the potential to unlock a new model for inclusive economic development in cities

The History of the Study of Landforms or the Development of Geomorphology, Volume 5 T.P. Burt, A.S. Goudie, H.A. Viles, 2022-10-20 Co published with British Society for Geomorphology This volume is the fifth in the definitive series The History of the Study of Landforms or the Development of Geomorphology Volume 1 1964 dealt with contributions to the field up to 1890 Volume 2 1973 with the concepts and contributions of William Morris Davis and Volume 3 1991 covered historical and regional themes during the classic period of geomorphology 1890 1950 Volume 4 2008 concentrated on studies of geomorphological processes and Quaternary geomorphology between 1890 and 1965 by the end of this period process based studies had become dominant Volume 5 builds on this platform covering in detail the revolutionary changes in approach that characterized the study of geomorphology in the second half of the twentieth century It is divided into three sections the first deals with changes in approach and method the second with changes in ideas and the broader scientific context within which geomorphology is studied and the final section details advances in research on processes and landforms The volume's objective is to describe and analyse many of the developments that provide a foundation for the rich and varied subject matter of twenty first century geomorphology

Dynamics of American Democracy Wendy J. Schiller, 2020-12-14 Democracy is in crisis Washington is failing Government is broken On these counts many politicians policy experts and citizens agree What is less clear is why and what to do about it These questions are at the heart of *Dynamics of American Democracy* which goes beneath the surface of current events to explore the forces reshaping democratic politics in the United States and around the world Bringing together leading scholars and practitioners of politics and governance this volume charts a twenty first century landscape beset by ideological polarization and political tribalism rapid demographic economic and technological change the influence of online news and social media and the increasing importance of public attitudes about gender and race Against this fraught background the authors consider the performance of the two party system the operations of Congress and the presidency and the ways in which ordinary citizens form their beliefs and make their voting decisions The contributors work represents a wide range of perspectives and methodological approaches and provides insight into what ails American governance from the practice of politics as tribal warfare to the electoral rules that produce a two party hegemony and from the impact of social media including how differently conservatives and liberals use Twitter to the significance of President Trump in historical and institutional perspective Finally *Dynamics of American Democracy* goes beyond diagnosis to present and evaluate the value and viability of proposals for reforming politics
