2014 Prospector Of University Of North West:

Handbook on Green Infrastructure Danielle Sinnett, Nick Smith, Sarah Burgess, 2015-11-27 Green infrastructure encompasses many features in the built environment. It is widely recognised as a valuable resource in our towns and cities and it is therefore crucial to understand, create, protect and manage this resource. This Handbook sets the context for green infrastructure as a means to make urban environments more resilient, sustainable, liveable and equitable. Including state of the art reviews that summarise the existing knowledge as well as research findings, this Handbook provides current evidence for the beneficial impact of green infrastructure on health, environmental quality and the economy. It discusses the planning and design of green infrastructure as a strategic network down to the individual features in a neighbourhood and looks at the process of green infrastructure implementation, emphasising the importance of collaboration across multiple professions and sectors. This comprehensive volume operates at multiple spatial scales from strategic networks at the regional level to individual features in neighbourhoods with international case studies used throughout to illustrate key examples of good practice. This collection of expert contributions will be invaluable to students and academics in the fields of planning, urban studies and geography. Practitioners and policy makers will also find the policy discussion and examples enlightening.

Routledge Handbook of Ecosystem Services Marion Potschin, Roy Haines-Young, Robert Fish, R. Kerry Turner, 2016-01-22 The idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades. It is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind. As a result, there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively. This handbook provides a comprehensive reference text on ecosystem services, integrating natural and social science, including economics. Collectively, the chapters written by the world's leading authorities demonstrate the importance of biodiversity for people, policy and practice. They also show how the value of ecosystems to society can be expressed in monetary and non-monetary terms so that the environment can be better taken into account in decision making. The significance of the ecosystem service paradigm is that it helps us redefine and better communicate the relationships between people and nature. It is shown how these are essential to resolving challenges such as sustainable development and poverty reduction and the creation of a green economy in developing and developed world contexts.

Soft Spaces in Europe Phil Allmendinger, Graham Haughton, Jörg Knieling, Frank Othengrafen, 2015-05-01 The past thirty years have seen a proliferation of new forms of territorial governance that have come to co-exist with and complement formal territorial spaces of government. These governance experiments have resulted in the creation of soft spaces, new geographies with blurred boundaries that eschew existing political territorial boundaries of elected tiers of government. The emergence of new non-statutory or informal spaces can be found at multiple

levels across Europe in a variety of circumstances and with diverse aims and rationales This book moves beyond theory to examine the practice of soft spaces It employs an empirical approach to better understand the various practices and rationalities of soft spaces and how they manifest themselves in different planning contexts By looking at the effects of new forms of spatial governance and the role of spatial planning in North western Europe this book analyses discursive changes in planning policies in selected metropolitan areas and cross border regions The result is an exploration of how these processes influence the emergence of soft spaces governance arrangements and the role of statutory planning in different contexts This book provides a deeper understanding of space and place territorial governance and network governance

Amakomiti Trevor Ngwane, 2021-02-20 One of the most exciting and provocative books that I've read in a long time Mike Davis author of *Planet of the Slums* Can people who live in shantytowns shacks and favelas teach us anything about democracy About how to govern society in a way that is inclusive participatory and addresses popular needs This book argues that they can In a study conducted in dozens of South Africa's shack settlements where more than 9 million people live Trevor Ngwane finds thriving shack dwellers committees that govern local life are responsive to popular needs and provide a voice for the community These committees called amakomiti in the Zulu language organise the provision of basic services such as water sanitation public works and crime prevention especially during settlement establishment Amakomiti argues that contrary to common perception slum dwellers are in fact an essential part of the urban population whose political agency must be recognised and respected In a world searching for democratic alternatives that serve the many and not the few it is to the shantytowns rather than the seats of political power that we should turn *The Strategic Repositioning of Arts, Culture and Heritage in the 21st Century* George Mugovhani, Owen Seda, 2018-06-11 The post millennium world has been experiencing several recognisable historical milestones with regard to arts culture and heritage One of these has been the resuscitation and revival of creative elements of the arts culture and heritage of previously marginalised or disadvantaged communities around the world Until recently there had been scant regard and skewed allocation of resources for these but lately attempts have been made to promote and sustain them in order to enable the socio economic aspirations of a multicultural society The contributions brought together here are the product of papers that were presented during a conference on Strategic Repositioning of Arts Culture and Heritage in the 21st Century They cover a broad spectrum of subjects such as indigeneity music song and identity politics national reconciliation education product development and national development **HC 257 - Investing In The Railway** Great Britain. Parliament. House of Commons. Transport Committee, 2015 The Transport Committee welcomes record investment committed to the classic rail network but calls for greater regional balance in spending Network Rail must also regain the confidence of passengers following recent disruption The Committee calls for the Government to take responsibility for rolling stock to address general shortages and ensure there will be sufficient trains to run on newly electrified lines The Committee also concluded i Record levels of funding show

a welcome commitment to classic rail but this should be set in a longer term strategic plan for the rail network which ties into a wider transport strategy ii The overrunning Christmas engineering works were unacceptable iii Network Rail must have adequate contingency plans They must also work with Passenger Focus and train operating companies to improve communication with passengers when engineering works fail iv In the light of the change of status of Network Rail the ORR must reconsider whether fining a public sector body remains an effective means for the regulator to exert control v Greater transparency is essential around rail spending Criteria used to allocate spending should be published

The Northern Question

Tom Hazeldine, 2020-10-06 Britain has scarcely begun to come to terms with its recent upheavals from the crisis over Brexit to the collapse of Labour's red wall What can explain such momentous shifts In this essential work Tom Hazeldine excavates the history of a divided country North and South industry versus finance Whitehall and the left behind Only by fully registering these deep seated tensions he argues can we make sense of the present moment Hazeldine tracks the North South divide over the longue dure from the formation of an English state rooted in London and the south east the Industrial Revolution and the rise of provincial trade unions and the Labour party the dashed hopes for regional economic renewal in the post war years the sharply contrasting fates of northern manufacturing and the City of London under Thatcher and New Labour to the continuing repercussions of financial crisis and austerity The Northern Question is set to transform our understanding of the politics of Westminster its purpose according to Hazeldine to stand English history on its head

The Mobilized American West, 1940-2000 John M. Findlay, 2023-07 In the years between 1940 and 2000 the American Far West went from being a relative backwater of the United States to a considerably more developed modern and prosperous region one capable of influencing not just the nation but the world By the dawn of the twenty first century the population of the West had multiplied more than four times since 1940 and western states had transitioned from rural to urban becoming the most urbanized section of the country Massive investment both private and public in the western economy had produced regional prosperity and the tourism industry had undergone massive expansion altering the ways Americans identified with the West In The Mobilized American West 1940 2000 John M Findlay presents a historical overview of the American West in its decades of modern development During the years of U S mobilization for World War II and the Cold War the West remained a significant distinct region even as its development accelerated rapidly and in many ways it became better integrated into the rest of the country By examining events and trends that occurred in the West Findlay argues that a distinctive region wide political culture developed in the western states from a commitment to direct democracy the role played by the federal

government in owning and managing such a large amount of land and the way different groups of westerners identified with and defined the region While illustrating western distinctiveness Findlay also aims to show how in its sustaining mobilization for war the region became tethered to the entire nation more than ever before but on its own terms Findlay presents an innovative approach to viewing the American West as a region distinctive of the United States one that occasionally stood ahead of at odds with and even in defiance of the nation
