Futile Efforts Alexander Michael, 2002-05-24 A young boy his mother and sister are abandoned in a dilapidated house while his brutal father makes a career out of prostituting women In order to help his mentally disturbed mother and abused sister escape the impoverished conditions under which they live the boy undertakes extraordinary measures to better himself He transforms his frail body into a form more suited for the cruel and violent world that was first introduced to him by his father He also sets out to overcome the learning disability that stands

between him and the college education he needs to help his family. It is not however until after the unrelated murders of the boys brother and best friend that the story takes its darkest turn. *Futile Efforts* provides a compelling story of psychological intrigue as it depicts the evolution of a scared frail boy into something that is more frightening than his worst nightmare. What sets *Futile Efforts* apart from its genre is not the terrible misfortunes described in the story but the responses to those misfortunes. *Futile Efforts* is made even more compelling by the fact that it is based entirely on a true story. God Calling Jeffrey J. Kilmartin, 2020-07-08. *God Calling* provides groundbreaking and provocative insights into how God works in the world through the gift of his Holy Spirit. In the NT we do not find the saints praying and constantly asking God what to do, instead the Spirit continuously leads and guides, giving Spiritual Direction for People in the Real World, people just like you. Looking at the biblical record as a whole, *God Calling* delivers a paradigm shift for our understanding of the indwelling Spirit's impact on Christians' decision making, prayer, life, spiritual practices, and knowing God's will. Bringing spiritual warfare down to the real world, *God Calling* helps us correct some of our hyper-spiritual practices while giving clear spiritual direction to enable followers of Jesus living in the real world to be wise, mature, and Christ-like, and for his church to be robust, proactive, and confident.

Mathematical Mindsets Jo Boaler, 2015-10-12. Banish math anxiety and give students of all ages a clear roadmap to success. *Mathematical Mindsets* provides practical strategies and activities to help teachers and parents show all children, even those who are convinced that they are bad at math, that they can enjoy and succeed in math. Jo Boaler, Stanford researcher, professor of math education, and expert on math learning, has studied why students don't like math and often fail in math classes. She's followed thousands of students through middle and high schools to study how they learn and to find the most effective ways to unleash the math potential in all students. There is a clear gap between what research has shown to work in teaching math and what happens in schools and at home. This book bridges that gap by turning research findings into practical activities and advice. Boaler translates Carol Dweck's concept of mindset into math teaching and parenting strategies, showing how students can go from self-doubt to strong self-confidence, which is so important to math learning. Boaler reveals the steps that must be taken by schools and parents to improve math education for all. *Mathematical Mindsets* explains how the brain processes mathematics learning, reveals how to turn mistakes and struggles into valuable learning experiences, provides examples of rich mathematical activities to replace rote learning, explains ways to give students a positive math mindset, gives examples of how assessment and grading policies need to change to support real understanding. Scores of students hate and fear math so they end up leaving school without an understanding of basic mathematical concepts. Their evasion and departure hinders math-related pathways and STEM career opportunities. Research has shown very clear methods to change this phenomena, but the information has been confined to research journals until now. *Mathematical Mindsets* provides a proven practical roadmap to mathematics success for any student at any age. *Home, School, and Community Collaboration* Kathy B.
