HC 401 - Managing the Care of People with Long-Term Conditions Great Britain: Parliament: House of Commons: Health Committee, 2014-07-03 15 million NHS patients in England with long term conditions such as diabetes arthritis and asthma account for 70% of the annual expenditure of the NHS in England One projection estimating that the bill for treatment of long term conditions will require the NHS to find 4 billion more each year by 2016 Increasingly patients do not have a single long term condition but live with two or more conditions complicating treatment and adding to its cost The Committee strongly supports the development of individual care planning for people with long term conditions based on the principles successfully demonstrated in the NHS House of Care programme Care planning approaches will involve GPs community health services and specialists sitting down with the patient to draw up a personalised plan for the care required which includes the support needed to help the patient manage his or her own condition The challenge though of introducing personalised care planning for 15 million people is substantial The Committee looked at the prevailing view that services to treat long term conditions should be moved out of hospitals and into primary and community care To provide effective care for these conditions services have to be maintained across all settings from support in the home through to acute specialist care and many conditions will continue to require specialist services delivered in hospital Effective management of long term conditions also requires collaboration with other government providers such as housing and transport services

Architectural Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Joana Pestana Lages, Susana Couceiro da

Costa,2019-08-08 The escalating interdependency of nations drives global geopolitics to shift ever more quickly Societies seem unable to control any change that affects their cities whether positively or negatively Challenges are global but solutions need to be implemented locally How can architectural research contribute to the future of our changing society How has it contributed in the past The theme of the 10th EAAE ARCC International Conference Architectural Research Addressing Societal Challenges was set to address these questions This book Architectural Research Addressing Societal Challenges includes reviewed papers presented in June 2016 at the 10th EAAE ARCC International Conference which was held at the facilities of the Faculty of Architecture of the University of Lisbon The papers have been further divided into the following five sub themes a Changing Society In Transit Global Migration Renaturalization of the City Emerging Fields of Architectural Practice and Research on Architectural Education The EAAE ARCC International Conference held under the aegis of the EAAE and of the ARCC is a conference organized every other year in collaboration with one of the member schools universities of those associations alternatively in North America or in Europe

Low-Income Consumers as a Source of Innovation Aline Krämer,2015-02-28 The dissertation shows why innovations are vital to succeed in the low income market segment i e the four billion people living on less than 8 USD per day In particular it explores the role low income consumers can play in corporate innovation processes The study tests and expands theoretical findings on user innovations and lead users in the Brazilian low income context The findings also aim to enhance the capacity of companies to develop new solutions for the so far untapped low income market by leveraging the knowledge of their target group

Singapore's Health Care System K. E. T. Al SATKU,2015-11-13 How did Singapore s health care system transform itself into one of the best in the world It not only provides easy access but its standards of health care not only in curative medicine but also in prevention are exemplary Fifty years ago the infant mortality rate IMR was 26 per thousand live births today the IMR is 2 Life expectancy was 64 years then today it is 83 The Singapore Medicine brand is trusted internationally and patients are drawn to Singapore from all over the world And while many countries struggle to finance their health care Singapore has developed a health care financing framework that makes health care affordable for its people and gives sustainability to the health care system Reliability is provided by a professional workforce that seeks to continually learn improve and become ever more proficient with cutting edge technology while emphasizing the relational aspects of health care by nurturing compassion and maintaining high standards of integrity Convenience and safety are enhanced by a unifying IT system that enables the portability of medical records across health care institutions All these have been achieved not by chance but by careful planning strong leadership and dedicated people who are prepared to learn from Singapore s own experience while adapting best practices from around the world But the system is not without challenges not least those of an aging population and an increasing market influence This book

provides a fascinating insight into the development of Singapore's health care system from the early days of fighting infections and providing nutrition supplementation for school children to today's management of lifestyle diseases and high end tertiary care. It also discusses how the system must adapt to help Singaporeans continue to live well, live long and with peace of mind.

Sustainability in Coffee Production Andrea Biswas-Tortajada, Asit K. Biswas, 2015-06-12

Coffee as a commodity and through its global value chains is the focus of much interest to achieve fair trade and equitable outcomes for producers, processors and consumers. It has iconic cultural and economic significance for Colombia which is one of the world's major coffee producers for the global market. This book examines sustainable coffee production in Colombia specifically the initiatives of Nestl to create shared value. It describes the transformation of the coffee landscape by the development of economically, socially and environmentally viable and dedicated supply chains. Suppliers have been encouraged to shift production and quality paradigms in order to develop long term and sustainable strategies for higher value and premium quality products. This has been partially achieved by establishing a robust partnership with the Coffee Growers Federation and other public, private and social actors thereby taking control of the institutional architecture and knowledge base that exists in the country. The book provides an important lesson of corporate social responsibility and the creation of shared value for the benefit of farmers, corporations and consumers.
