 INSTRUMENT OF POWER PROJECTION 2013 INTRODUCTION INTRODUCTION The Seabees of the United States Navy
 were born in the dark days following Pearl Harbor when the task of building victory from defeat seemed almost
 insurmountable The Seabees were created in answer to a crucial demand for builders who could fight Using sailors to build
 shore based facilities however was not a new idea Ancient Egyptians Phoenicians Greeks and Romans did it In more recent
 times from the earliest days of the United States Navy sailors who were handy with tools occasionally did minor construction
 chores at land bases After the 7 December 1941 Japanese attack on Pearl Harbor and the United States entry into the war
 the use of civilian labor in war zones became impractical Under international law civilians were not permitted to resist enemy
 military attack Resistance meant summary execution as guerrillas The need for a militarized Naval Construction Force to
 build advance bases in the war zone was self evident Therefore Rear Admiral Ben Moreell determined to activate organize
 and man Navy construction units On 28 December 1941 he requested specific authority to carry out this decision and on 5
 January 1942 he gained authority from the Bureau of Navigation to recruit men from the construction trades for assignment
 to a Naval Construction Regiment composed of three Naval Construction Battalions This is the actual beginning of the
 renowned Seabees who obtained their designation from the initial letters of Construction Battalion Admiral Moreell
 personally furnished them with their official motto Construimus Batuimus We Build We Fight **List of Training Manuals
