Drawing on ecological perspectives of language learning and spatial understandings of digital technology and learning, the research reported in this book unpacks how social media technologies are used for language learning. It presents insights from a dual level qualitative methodological design: a comparative study of public online data of social media posts collected from TikTok and Instagram and a multiple case study based on ethnographic narrative data gathered from participants' journal entries, stimulated recall interviews, and social media posts. This book reveals the dynamic landscape of digital language learning that is being integrated into learners' everyday lives through multimodal content creation and networking.
