grow at least 20 percent faster than those grown in soil Better yields You can expect 20 to 25 percent more yield when you adopt hydroponic gardening Less water Less water is needed simply because hydroponic systems are enclosed and thus the plants get the water they need instead of such water being distributed to the surrounding environment Less space Because the plants have easier access to nutrients when they are grown in a hydroponic system they do not need to grow deep roots or spread them widely in search of nutrients Thus you will be able to grow your plants more closely and thus grow more plants in a smaller space More freedom to grow your crops The best thing about hydroponic gardening is that it gives more people the opportunity to grow plants regardless of where they live You can easily grow crops indoors even if you live in an apartment No need of soil With hydroponic gardening you don't use soil Instead you use what is known as grow medium to house or hold the plants This is less messy and easier to control than soil Before you can enjoy the above amazing benefits of opting for hydroponics to grow fruits and vegetables you will first need to learn how to grow plants using this step The first thing you need to do is to select a hydroponic system that will allow you to comfortably grow your vegetables and fruits Here is A Preview Of What You Will Learn What is Hydroponic Gardening Which hydroponic system should I use Which medium should I choose What about hydroponic nutrients and pH Choose a Light Source And Much Much More Take Action Now And Get This Kindle Book For ONLY 0.99
