Page i *Protecting and Accessing Data from the Survey of Earned Doctorates* National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, 2010-01-25 The Survey of Earned Doctorates SED collects data on the number and characteristics of individuals receiving research doctoral degrees from all accredited U S institutions The results of this annual survey are used to assess characteristics and trends in doctorate education and degrees This information is vital for education and labor force planners and researchers in the federal government and in academia To protect the confidentiality of data new and more stringent procedures were implemented for the 2006 SED data released in 2007 These procedures suppressed many previously published data elements The organizations and institutions that had previously relied on these data to assess progress in measure of achievement and equality suddenly found themselves without a yardstick with which to measure progress Several initiatives were taken to address these concerns including the workshop summarized in this volume The goal of the workshop was to address the appropriateness of the decisions that SRS made and to help the agency and data users consider future actions that might permit release of useful data while protecting the confidentiality of the survey responses

Statistics Gudmund R. Iversen, Mary Gergen, 2012-12-06 discussed in this book It is clear that with an understanding of the main ideas of statistics engaged citizens can grasp what the professional number crunchers have produced and evaluate the results This book grew out of a course designed by Gudmund R Iversen to meet the challenges created by this greater reliance on statistical It was one of a series of courses designed at Swarthmore information College to fulfill the mission of a liberal arts college to educate its students for the challenges of the twenty first century The idea was that students should not become so involved with the intricacies of a single discipline that they lose sight of the big picture These courses were intended to educate students to understand how the major ideas of a field relate to the world In many respects statistics seemed an ideal subject for one such course While statistics could be a mystifying self aggrandized and esoteric discipline it could also be a key to understanding many other disciplines The course Stat 1 Statistical Thinking was created to produce this understanding The course proved to be very popular and each year it grew in size Over time the lecture notes for the course became more refined and extensive and eventually the course material served as the basis for this book

Formulas As most statistics instructors are keenly aware the teaching of statistics has changed dramatically

Understanding and Responding to the Experience of Disability Jill Porter, 2014-08-13 Understanding and Responding to the Experience of Disability informs readers about current understandings of disability and ways of recognizing the needs that arise from the lived experience of impairment in schools While most schools have clear procedures in place with respect to identifying children with special educational needs the same is not true for disability Moreover research suggests that many schools have restricted understanding of this distinction often equating disability to children with SEN and children with health conditions thereby failing to recognize the pivotal role of impact In this insightful text Jill Porter argues that disability needs to be understood within the setting in which it is experienced thereby recognizing that it is not a fixed attributable label but one that is cultural contextual and fluid By providing a theoretical basis for understandings of disability around notions of impairment experience and impact the book combines three key components a conceptual understanding of disability to provide a clear value driven framework for professional responses an empirical illustration of the development of materials to support an understanding of why the process of disability data collection cannot simply be reduced to two questions on a form embedded illustrative case study material to provide exemplars of how the materials can be contextualized and used to make adjustments to enhance the participation of all children
