Musundire, Austin, 2025-03-05. The dawn of the digital age has brought forth a remarkable transformation in the field of educational leadership and management catalyzed by the emergence of chatbots. This evolution has been underpinned by a confluence of technological advancements and a growing recognition of the need for efficient administrative solutions. As a result, it has led to their widespread adoption in educational institutions where they have proven to be instrumental in streamlining administrative tasks, enhancing communication channels, and even offering personalized support to students and staff. Furthermore, the emergence of chatbots in educational leadership has not only revolutionized administrative processes but has also spurred innovation in pedagogical approaches. *Chatbots in Educational Leadership and Management* explores the genesis and evolution of Chatbots within the realm of educational leadership and management, tracing their trajectory from humble beginnings to their current role as influential agents of change. Official Gazette Philippines, 2012 *Corrupted* Jonathan D

Jansen, 2023-02-01. In South African higher education, the images of dysfunction are everywhere. Student protests, violence, police presence, rubber or real bullets, class disruptions, burning tyres, damaged buildings, injury, and sometimes death. Reports of wholesale corruption. Year after year, often in the same set of universities, the problem of routine instability seems insoluble. The financial, academic, and reputational costs of ongoing dysfunction are high, especially for those universities caught up in the never-ending struggle to overcome apartheid legacies. Any number of explanations have been ventured, including a lack of resources, shortage of capacity, rural location, corrupt officials, and endemic conflict. *Corrupted* takes a

deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
