

NOTICE

Kindly be advised of the following information pertaining to the second semester modular additions for the 2024 academic year.

Second semester modular additions and cancellations for all students

1. Students who are currently registered for the 2024 academic year will be afforded with the opportunity to add semester two modules to their registration. These students will be able to use the iEnabler to access the option to register for semester two modules. Ensure that you click on the "add subjects to a registration" tab, to check if there are any modules available to be added. Should there be no modules, then there should be no need to add modules to your registration.
2. Students who did not register for year 2024 and are left with one or two modules in the second semester to complete their qualification, will also be afforded the opportunity to register the remaining second semester modules, but permission should be given by their HOD's to be readmitted. Applications for re-admission must be applied for using the new VUT application for re-admission form (on the new VUT letterhead) to be obtained on the VUT website (www.vut.ac.za). These application forms must first be sent to the HOD for approval, and thereafter to Academic Administration for further processing. By signing the readmission form, the respective HOD confirms that they have performed the necessary checks and confirm that students have only one or two modules outstanding to complete their qualifications. The students will be registered for the qualification in the back office, and thereafter students will themselves add the modules via the iEnabler. Students must ensure that they have paid their **Registration fee of R2500.**

3. Please note that this is the last arrangement that allows for the dual registration. All students must register during the first semester of each academic year even if they only have second semester modules outstanding. VUT has approved for a single registration that must be conducted in January of each academic year.

Ultrasound Guided Regional Anesthesia and Pain Medicine Paul E. Bigeleisen, 2012-02-03 This full color text atlas describes all of the nerve blocks for which ultrasound guidance has proved efficacious including upper and lower limb blocks. The chapter organization is similar to Chelly's Peripheral Nerve Blocks book; each block is described by concise text covering the indications for use, necessary equipment, anatomic landmarks, approach and technique. The blocks are richly illustrated by ultrasound stills and relevant anatomy. A companion Website will have video modules on 1) principles of sonography including how to turn on the machine, set up the transducers, move the transducers, change the contrast, depth, frequency and dynamic range, compression settings, how to use color Doppler flow imaging and align the needle with the beam, and 2) ultrasound guided blocks of the interscalene, supraclavicular, infraclavicular, axillary, femoral, subgluteal, popliteal and caudal regions.
