Kenya and the Politics of a Postcolony Wanjala S. Nasong'o, 2024-08-06 This book sets out to probe explore and evaluate the betrayal of anticolonial nationalism in Kenya Contemporary Kenya's emergence is rooted in the colonial enterprise its deleterious effects and the subsequent decolonization spearheaded by a fierce anti colonial nationalism that was embodied in freedom struggles at the cultural political and military levels As a settler colony the colonial settlers hived off millions of hectares of the best land in the highland areas of Kenya and appropriated them for themselves thereby generating a large mass of the landless This land alienation constituted one of the most deeply felt grievances which together with the exclusivist exploitative and oppressive colonial system inflamed anti colonial nationalism that undergirded the struggle for independence The expectation on the part of the masses was that independence would bring about social justice restitution of the stolen lands and a government based on the will and aspirations of the governed Political developments soon after independence however demonstrated the extent of betrayal of the cause of anti colonial nationalism which has remained the reality to date This book covers the extent of this sense of betrayal from the time of independence to the present It begins by locating contemporary Kenya within the colonial context then proceeds to thematic issues of betrayal including the fall out between President Kenyatta and Vice President Odinga over ideology and issues of development which constituted the first betrayal the scourge of bureaucratic corruption and rent seeking the question of land and associated historical injustices and electoral malpractice since the return of multiparty politics in 1992 to the most recent elections of 2022 The implications of these dynamics for the future of the Kenyan polity are delineated and discussed **The WIPO Academy Year in Review 2016 - Sharing Knowledge, Building Capacity** World Intellectual Property Organization, This report introduces the work of the Academy and highlights the achievements in 2016 Growth and Decline in the Anglican Communion David Goodhew, 2016-12-15 The Anglican Communion is one of the largest Christian denominations in the world Growth and Decline in the Anglican Communion is the first study of its dramatic growth and decline in the years since 1980 An international team of leading researchers based across five continents provides a global overview of Anglicanism alongside twelve detailed case studies The case studies stretch from Singapore to England Nigeria to the USA and mostly focus on non western Anglicanism This book is a critical resource for students and scholars seeking an understanding of the past present and future of the Anglican Church More broadly the study offers insight into debates surrounding secularisation in the contemporary world *Plagues and the Paradox of Progress* Thomas J. Bollyky, 2019-10-01 Why the news about the global decline of infectious diseases is not all good Plagues and parasites have played a central role in world affairs shaping the evolution of the modern state the growth of cities and the disparate fortunes of national economies This book tells that story but it is not about the resurgence of pestilence It is the story of its decline For the first time in recorded history virus bacteria and other infectious diseases are not the leading cause of death or disability in any region of the world People are

living longer and fewer mothers are giving birth to many children in the hopes that some might survive And yet the news is not all good Recent reductions in infectious disease have not been accompanied by the same improvements in income job opportunities and governance that occurred with these changes in wealthier countries decades ago There have also been unintended consequences In this book Thomas Bollyky explores the paradox in our fight against infectious disease the world is getting healthier in ways that should make us worry Bollyky interweaves a grand historical narrative about the rise and fall of plagues in human societies with contemporary case studies of the consequences Bollyky visits Dhaka one of the most densely populated places on the planet to show how low cost health tools helped enable the phenomenon of poor world megacities He visits China and Kenya to illustrate how dramatic declines in plagues have affected national economies Bollyky traces the role of infectious disease in the migrations from Ireland before the potato famine and to Europe from Africa and elsewhere today Historic health achievements are remaking a world that is both worrisome and full of opportunities Whether the peril or promise of that progress prevails Bollyky explains depends on what we do next
