Governability of Fisheries and Aquaculture: Theory and Applications Maarten Bavinck, Ratana Chuenpagdee, Svein Jentoft, Jan Kooiman, 2013-04-10 Following from Fish for Life Interactive Governance for Fisheries Kooiman et al 2005 which presents an interdisciplinary and intersectoral approach to the governance of capture and aquaculture fisheries this volume pursues what interactive governance theory and the governability perspective contribute to the resolution of key fisheries problems these include overfishing unemployment and poverty food insecurity and social injustice Since these problems are varied and can be felt among governments resource users and communities globally the diagnosis must be holistic and take account of principles institutions and operational conditions The authors argue that wicked problems and institutional limitations are inherent to each setting and must be included in the analysis The volume thereby offers a new lens and a systematic approach for analysing the nature of problems and challenges concerning the governance of fisheries explores where these problems are situated and how potential solutions may be found It now seems clear that the crisis in the world's fisheries is a much larger and more complex problem than many had imagined Yet examining it through the lens of governability may offer the best hope for alleviating it as well as alleviating similar crises in other social systems James R McGoodwin Professor Emeritus University of Colorado

Just Enough Nitrogen Mark A. Sutton, Kate E. Mason, Albert Bleeker, W. Kevin Hicks, Cargale Masso, N. Raghuram, Stefan Reis, Mateete Bekunda, 2020-11-09 This volume provides a unique collection of contributions addressing both the too much and too little sides of the nitrogen story Building on analyses started at the 6th International Nitrogen Conference Kampala the book explores the idea of just enough nitrogen sufficient for sustainable food production but not so much as to lead to unsustainable pollution and climate problems The range of nitrogen threats examined solutions evaluated and science policy analyses presented here has provided the foundation to agree the Kampala Statement for Action on Nitrogen in Africa and Globally as reported in this volume Humanity today faces unprecedented challenges How to feed a growing population How to reduce air pollution water pollution and climate change How to handle regional differences in an era of increasing globalization These questions are at the heart of this edited volume which examines the multi dimensional nature of the global nitrogen challenge While humans have massively altered the nitrogen cycle the consequences have become polarized Some regions have too much nitrogen associated with pollution and wasteful use of a valuable resource while other regions have too little nitrogen leading to constraints on food production and depletion of soil nutrient stocks The volume provides a unique collection of contributions addressing both the too much and too little sides of the nitrogen story Building on analyses started at the 6th International Nitrogen Conference Kampala the book explores the idea of just enough

nitrogen sufficient for sustainable food production but not so much as to lead to unsustainable pollution and climate problems The range of nitrogen threats examined solutions evaluated and science policy analyses presented here has provided the foundation to agree the Kampala Statement for Action on Nitrogen in Africa and Globally as reported in this volume Together the contributions in this book are now informing actions by the International Nitrogen Initiative INI in working with the United Nations Environment Programme and others to establish the International Nitrogen Management System INMS A key outcome has been to catalyse development of the first Resolution on Sustainable Nitrogen Management as adopted by the fourth UN Environment Assembly UNEA EA 4 Res 14 The work is written for researchers and policy makers and all those interested in seeing how sustainable nitrogen management can contribute to meeting many of the UN Sustainable Development Goals Modelling Vector-borne and Other Parasitic Diseases Hansen, J.W (ed.),Brain D.
