the ability of a country to convince others that its cause is the best without having to resort to economic or military threats the your ability to accurately describe the world we live in needs repair lenses The power of example the power of attraction through culture or in other words the ability of a country to attract others because of its culture and political values in its foreign policy that is soft power is something that emerges in partly because of government and partly in spite of governments To have soft power you need to be connected and the interaction management and dissemination of assets can be seen as exercises in soft power action This book seeks to detail in examples how the concept of soft power encompasses and problematizes the multiplicity of themes on the contemporary international agenda focusing on one of its least discussed elements the universe of international cultural heritage and the relationship between actors and society preservationist actions in the globalized world While cultural heritage embodies different values and can serve different economic social and political objectives in development contexts the past becomes a cultural currency when it becomes essential to the human experience

Universities, Inclusive Development and Social Innovation Claes Brundenius, Bo Göransson, José Manoel Carvalho de Mello, 2016-10-25 This book examines the ways in which universities can play a crucial role in inclusive development social innovation and social entrepreneurship It aims to prove the importance of inclusive development and inclusive innovation on economic growth and demonstrate the ways in which universities can be pioneers in this area through initiatives in social responsibility and social innovation For example providing access to a university education without discrimination of race gender income status or other factors would help to diminish the increasing income differentials currently being experienced in many countries especially in the developing world The research and studies included in this book provide insight into possible actions that can be taken by universities and public and private shareholders in inclusive development social innovation social entrepreneurship and overall regional economic and social development Innovation is currently considered to be the most important and dynamic factor explaining growth and development At the same time the traditional view considering innovation as having to be

commercialized at any price is being challenged. Lately there has been growing interest in innovation in the public sector particularly with respect to social innovations designed to reduce income inequality. To address these concepts, constant exchange of ideas and information between research groups became necessary. UniDev Universities in Development: The Evolving Role of Academic Institutions in Innovation Systems and Development is an international research group with researchers in twelve countries interested in the role of universities in development. This book features the results of research performed by eleven research groups from UniDev country communities presenting in depth and comparative case studies from universities around the world including Latin America, Northern and Eastern Europe and sub-Saharan Africa. Promoting sustainable local economic development initiatives Marius Venter, 2022. This book endeavours to outline case studies that promote sustainable Local Economic Development (LED) initiatives. It is generally believed that local governments are the foot soldiers of LED. However, this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives. The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways. The book is an essential part of this sequence of ideas, development and action at a critical time for strategic action directed at a sustainable future. It showcases case studies and responses to the impacts of globalisation as a bridge between urban, rural and institutional action and reveals avenues for local government leadership in communities, research, student engagement and wider interactions.

Perspectives on the Legislature and the Prospects of Accountability in Nigeria and South Africa Omololu Fagbadebo, Fayth Ruffin, 2018-08-03. This book examines the problem of accountability in two African political systems, South Africa and Nigeria. Despite the principle of separation of powers and the doctrine of checks and balances among the institutions of governance, a burgeoning governance crisis stifles the potential of accountability and good governance. Legislative oversight in the two countries remains largely ineffective while citizens are left to face the consequences of the mismanagement of public resources by political elites. This book critically assesses how the legislative institutions in South Africa and Nigeria have been unable to harness the requisite constitutional powers to ensure accountability in government and explores the feasibility of their effectiveness. The book begins with a comparative analysis of the principles, tradition and powers associated with legislative capability in South Africa and Nigeria. The chapters explore constitutional provisions and analyze the capacity of each legislature to function within its respective political environment. The book also examines the process and challenges associated with the various measures and mechanisms available for legislatures to ensure accountability in the two countries. Researchers, scholars and students of African politics will find this book useful in their understanding of the problems associated with the simmering governance crisis in South Africa and
