Nurse Educator's Guide to Best Teaching Practice Keeley C. Harmon, Joe Ann Clark, Jeffery M. Dyck, Vicki Moran, 2016-09-07 This book presents essential teaching skills and tools for nurse educators. It begins with a discussion of the trends in nursing education and the principles of teaching and learning. The book then explores topics such as classroom teaching, clinical experiences, teaching in the simulation laboratory, and online learning. Each chapter discusses the basics of teaching and learning in the specific environment, followed by scenarios that focus on the issues encountered by nursing faculty in these settings. The scenarios present the key issues under consideration, recommend actions that faculty members can institute to address the issues, and describe rationales and solutions based on best evidence. The book also includes specific tools designed to assist nurse educators in preparation for the teaching role, such as examples of course syllabi, program outcomes, clinical contracts, and action plans. **Nurse Educator's Guide to Best Teaching Practice** is a valuable resource for novice and experienced educators in managing the challenges inherent in nursing education.

Banking's Final Exam Morris Goldstein, 2017-05-30 Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009, stress testing of large financial institutions has become the cornerstone of banking supervision worldwide. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In **Banking's Final Exam**, one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses leading to a false sense of reassurance about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing bank capital regime, but others will require bold reforms, including higher minimum capital requirements for the largest and most systemically important banks. The banking industry is likely to resist these reforms, but this book explains why their objections do not hold water.

From the Laboratory to the Classroom Jared Cooney Horvath, Jason M. Lodge, John Hattie, 2016-07-22 Over recent years, the field of Science of Learning has increased dramatically. Unfortunately, despite claims that this work will greatly impact education, very little research makes it into teacher practice. Although the reasons for this are varied, a primary concern is the lack of a proper translation framework. **From the Laboratory to the Classroom** aims to consolidate information from many different research disciplines and correlate learning principles with known classroom practices in order to establish explanatory foundations for successful strategies that can be implemented into the classroom. It combines theoretical research with the diverse and dynamic classroom environment to deliver original, effective, and specific teaching and learning strategies and address questions concerning what possible mechanisms are at play as people learn. Divided into five sections, chapters cover: A Framework for Organizing and Translating Science of Learning Research; Motivation and Attention as Foundations for Student Learning; Memory and Metamemory Considerations in the Instruction of Human Beings; Science of Learning in Digital Learning Environments.

Educational Approaches for Students Experiencing Learning Difficulties and Developmental Characteristics of Gifted Children Brain Behaviour and Classroom Practice Forging Research Practice Relationships via Laboratory Schools This fascinating text gathers an international team of expert scientists teachers and administrators to present a coherent framework for the vital translation of laboratory research for educational practice Applying the Science of Learning framework to a number of different educational domains it will be an essential guide for any student or researcher in education educational psychology neuropsychology educational technology and the emergent field of neuroeducation
