Positive Psychological Intervention Design and Protocols for Multi-Cultural Contexts Llewellyn Ellardus Van Zyl, Sebastiaan Rothmann Sr., 2019-06-11 This volume presents innovative and contemporary methodologies and intervention protocols for the enhancement of positive psychological attributes in multicultural professional and organizational contexts. Most methods, models, and approaches that underpin positive psychological interventions are confined to clinical samples, closed systems, or monocultural contexts which restrict their applicability to particular contexts. Extensive practical intervention protocols, designs, and methods which usually accompany first draft intervention papers are condensed into brief paragraphs in final manuscripts or removed in their entirety. This in turn reduces their potential for replicability or adoption by consumers, practitioners, or industry. This volume develops guidelines for enhancing positive psychological attributes such as positive moods, e.g. positive affect, life satisfaction, strengths, e.g. gratitude, humour, cognitions, e.g. hope, optimism, and behaviours, e.g. emotional regulation, positive relationship building within various multicultural contexts. Thereby it shows how positive psychology interventions can be replicated to a wide range of contexts beyond those in which they were developed.

Unifying Causality and Psychology Gerald Young, 2016-05-17 This magisterial treatise approaches the integration of psychology through the study of the multiple causes of normal and dysfunctional behavior. Causality is the focal point reviewed across disciplines. Using diverse models, the book approaches unifying psychology as an ongoing project that integrates genetics, experience, evolution, brain development, change mechanisms, and so on. The book includes in its integration free will epitomized as freedom in being. It pinpoints the role of the self in causality and the freedom we have in determining our own behavior. The book deals with disturbed behavior as well and tackles the DSM 5 approach to mental disorder and the etiology of psychopathology. Young examines all these topics with a critical eye and gives many innovative ideas and models that will stimulate thinking on the topic of psychology and causality for decades to come. It is truly integrative and original. Among the topics covered: Models and systems of causality of behavior, Nature and nurture, evolution and complexities, Early adversity, fetal programming, and getting under the skin, Free will in psychotherapy, helping people believe, Causality in psychological injury and law, basics and critics, A Neo Piagetian Neo Eriksonian 25 step sub stage model. *Unifying Causality and Psychology* appeals to the disciplines of psychology, psychiatry, epidemiology, philosophy, neuroscience, genetics, law, the social sciences, and humanistic fields in general, and other mental health fields.
