Teacher Education at the Edge Tonya Huber, James G. O'Meara, 2019-12-01 International Education Inquiries is a book series dedicated to realizing the global vision of Education 2030 This vision involves ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for

all The founding editors seek to provide a forum for the diverse voices of scholars and practitioners from across the globe asking questions about transforming the vision of Education 2030 into a reality Published chapters will reflect a variety of formats free of methodological restrictions involving disciplinary as well as interdisciplinary inquiries We expect the series will be a leading forum for pioneers redefining the global discussion about the people places and perspectives shaping Education 2030 outcomes Education 2030 topics of interest include but are not limited to Improving access to quality early childhood development care and pre primary education Ensuring equal access for all women and men to affordable and quality education Increasing the number of youth and adults who have skills relevant for sustainable living and livelihoods Ensuring equal access for the vulnerable including persons with disabilities indigenous peoples and children in vulnerable situations Achieving levels of literacy and numeracy required to engage in communities and employment Acquiring the knowledge and skills needed to promote sustainable development including Human right Gender equality Promotion of a culture of peace and non violence Global citizenship education The appreciation of cultural diversity and of culture s contributions to sustainable development Providing safe non violent inclusive and effective learning environments for all Recruiting preparing supporting and retaining quality teachers Children, Childhood, and the Future Andrea Kleeberg-Niepage, 2020-01-10 Although most of the world s children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children s lives Community Participation in School Management Kazuro Shibuya, 2022-09-12 Nobody denies that trust in schools is key to success in generating any educational outcomes However trust is often eroded resulting in conflicts alienation and differentiation among school level stakeholders This book analyses school based management SBM of education through the lens of relational trust in the context of Ghana revealing how community participation in school management leads to educational outcomes Conducting quantitative analysis of headteacher questionnaires from public basic schools and qualitative analysis of case study schools in the Akatsi South District of Ghana Shibuya offers critical insights into building sustainable relationships between individual households and geographical school communities He argues it is critical to highlight relational trust as an analytical tool to examine relationships between actors and factors in school management The research finds that trust in schools is a two way mechanism and the mutuality of expectations and obligations among stakeholders is essential if children s learning outcomes are to improve With its mixed methods approach this book will be a valuable resource for scholars in comparative education those in educational development and those

interested in African contexts
