Committee on Veterans' Affairs, 1954 The Development of British Amphibious Operations 1882-1914 Joseph Moretz, 2025-11-30 The projecting of military force to a distant shore has come to be seen as a uniquely British way of waging war To be sure many of these operations would now be classed as administrative landings with battle if occurring at all only following sometimes afterward Others of course merit the label of opposed landings To contemporaries of the period covered by this study the evolutions went by the appellation of conjoint or combined operations Less important than how they were styled remains the thought and the purpose giving rise to these ventures In the decades before the First World War professionals appreciated the myriad difficulties and dangers

associated with amphibious operations The laity including statesmen thought rather less of these matters but could recount numerous examples of their occurrence before 1914 Indeed whatever operational failings Britain demonstrated during the World War a corpus of relevant experience was the least of these What is now styled joint amphibious operations were difficult because they were never of a single type Naval support to a military force standing on the defensive raids feints blocking operations riverine operations and yes an opposed landing spoke to a series of joint operations of ever increasing complexity Meanwhile as every operation must at some point end even the manner of evacuation came to be viewed as a special type of combined operation to be understood and learned Finally it remained that in a campaign of the grandest scale examples of each might feature at differing moments along the way Landings before 1914 were difficult and what military and naval authorities thought feasible before the onset of the World War in the realm of joint operations is a neglected field of study a surprising omission given the ink that has been spilt retelling the debacles experienced at Gallipoli Mesopotamia and East Africa Every campaign has its context operational and strategic to be sure but also political doctrinal and bureaucratic How Britain elected to wage war in 1914 proved a product of these variables just as surely as the military and naval capabilities it could muster Tying the strands of pre war military experience and thought in the realm of joint operations is the chief purpose of this study which takes as its starting point 1882 and the British assault against Egypt The choice is far from arbitrary as the moment saw several earning their spurs who would later play a central role in the amphibious operations executed during the Great War To the extent learning is more than the product of self experience this work pays special attention to the Russo Japanese War Thinking officers appreciated that fundamental changes were occurring in the nature and style of war A learned public also appreciated this courtesy of works such as Ivan Bloch s *Is War Now Possible* Notwithstanding what British officers understood on the eve of the World War the problem of time and scale remained This alone should give one pause before chiding others over past mistakes This study looks at what was thought what was taught what was expected and what occurred in the thirty years before Britain found herself facing a scale of conflict not witnessed in a century [List of U.S. Public Documents for Sale by the Superintendent of Documents ...
