

EASTERN EUROPE AND CENTRAL ASIA

The annual number of new HIV infections in eastern Europe and central Asia continues to rise. It reached 140 000 [120 000–160 000] in 2023, a 20% increase since 2010 (Figure 12.1). The region is off track to reach the targets to end AIDS by 2030. Four countries (Kazakhstan (1), Russian Federation (2), Ukraine (1), Uzbekistan (3)) report 92% of all new registered HIV cases¹ in the region according to published case reports from 15 of 16 countries.

In 2022, 94% of new HIV infections were among people from key populations and their sex partners, and 15% of new infections were among sex workers (4). HIV case reporting in the region suggests that an increasing proportion of new HIV infections are transmitted sexually. Available data suggest one explanation for this is transmission from people who inject drugs or formerly injected drugs to their partners in addition to a

Aids Central Asia Report:

HIV/Aids And Tuberculosis in Central Asia Joana Godinho, 2004 Averting AIDS Crises in Eastern Europe and Central Asia Olusoji Adeyi, 2003-01-01 The countries of Eastern Europe and the central Asian region are experiencing the greatest increases in rates of HIV AIDS and tuberculosis infections This publication sets out the World Bank's regional support strategy which seeks to provide a unifying framework for the Bank's work as part of the international support for country led responses to these public health problems It identifies short to medium term priorities and clarifies options for integrating effective interventions into the broader agenda of poverty reduction and economic development **Central Asia Human Development Report** Johannes F. Linn, Martha Blaxall, 2005 This report is a comprehensive analysis of the many challenges that confront Central Asia including high trade costs environmental devastation increased inequality rising migration the rapid spread of HIV AIDS and poor governance There has been recent progress towards regional cooperation but the barriers created by borders negatively affect peoples lives It is contended that increased cooperation among the Central Asian republics Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan would produce substantial political and economic gains including income increases of 50 percent to 100 percent over the next ten years The cost of non cooperation is continued deterioration in income distribution social services and general living conditions according to the Report and possibly a descent into the vicious cycle of economic crisis and corrupt governance that often leads to social unrest *Drugs and Public Health in Post-Soviet Central Asia* Muyassar Turaeva, 2022-08-27 The book outlines post Soviet style of health management in Central Asia Regional studies on Central Asia to date have focused on states politics religion and inter ethnic relations but not on the health system within the region Soviet style policies have also covered only other aspects relevant for the region This book highlights the public health situation of the region with a focus on drug abuse HIV AIDS in the context of increased mobility and drug trafficking routes which became even more porous after the break up of the Soviet Union Based on a qualitative study the empirical data in the book was collected during long term fieldwork conducted in Uzbekistan and Turkmenistan in 2010 2011 as well as shorter stays in Uzbekistan between 2012 2016 The analysis of the empirical material largely draws on the works of Foucault particularly his concept of biopolitics when analyzing Soviet style health management that is still practiced in the region Applying the Foucauldian genealogical method this study has been structured to trace the genealogy of epidemics to understand the historical path of drug abuse in the region as well as the discursive genealogy of drug politics and drug abuse Applying the same genealogical method of Foucault the formative and discursive trajectory of the institution of Uchyot was traced to contextualize the health governance methods that have historical legacy of Soviet style governance and control of the total population *Drugs and Public Health in Post Soviet Central Asia* Soviet Style Health Management is a unique resource for academic specialists practitioners professionals and advanced undergraduate and graduate students in public health as well as a range of scholars

and professionals in sociology political science anthropology and anyone with an interest in the Central Asia region drug addiction or HIV The book also could appeal to international donors in the field of HIV drug addiction who are working in the region **HIV Epidemics in the European Region** Lucy Platt,Emma Jolley,Vivian Hope,Alisher Latypov,Peter

Vickerman,Ford Hickson,Lucy Reynolds,Tim Rhodes,2015-02-12 This report describes the dynamics of HIV epidemics among vulnerable and high risk populations in the European region in particular people who inject drugs sex workers and men who have sex with men It aims to inform future HIV responses and guide HIV prevention surveillance and research **Central**

Asia's Second Chance Martha Brill Olcott,2010-03-01 A leading authority on Central Asia offers a sweeping review of the region's path from independence to the post 9 11 world The first decade of Central Asian independence was disappointing for those who envisioned a straightforward transition from Soviet republics to independent states with market economies and democratic political systems Leaders excused political failures by pointing to security risks including the presence of terrorist training camps in Afghanistan The situation changed dramatically after 9 11 when the camps were largely destroyed and the United States introduced a military presence More importantly the international community engaged with these states to give them a second chance to address social and economic problems But neither the aid givers nor the recipients were willing to approach problems in new ways Now terrorists groups are once again making their presence felt and some states may be becoming global security risks This book explores how the region squandered its second chance and what might happen next *2008 Report on the Global AIDS Epidemic* Joint United Nations Programme on HIV/AIDS.,2008 Knowing

your epidemic is essential for everyone involved in the response to HIV Extensively illustrated with graphs and charts this biennial report presents concise but comprehensive summaries of major issues in the global AIDS response Annexes provide HIV estimates and data 2001 and 2007 and also country progress indicators *HIV/AIDS and Tuberculosis in Central Asia*

Joana Godinho,2004 Although the countries in the Central Asia region are still at the earliest stage of an HIV AIDS epidemic they are experiencing a steep growth of new HIV cases related epidemics of injected drug use sexually transmitted infections STIs and tuberculosis They also have a large youth population and low levels of public awareness about the epidemics This report contains country profiles which identify key issues and recommend further action covering epidemiology strategic and regulatory frameworks surveillance preventive diagnostic and treatment activities non governmental and partner activities and resources available *Report of the International Narcotics Control Board 2004* International Narcotics Control

Board,2005-04-01 This annual report from the International Narcotics Control Board gives an extensive analysis of illicit drug abuse and the efforts to control it at the national and international level The 2004 report contains chapters on the following topics the interaction between supply and demand of illicit drugs and the need for integrated reduction strategies the operation of the international drug control system including the national drug control strategy adopted by Afghanistan and a review of the world and regional situation in terms of treaty adherence national policies and regional co operation cultivation

production trafficking and abuse *HIV/Aids in the Western Balkans* ,2005-01-01 In recent years Europe and Central Asia has experienced the world s fastest growing HIV AIDS epidemic Yet in the Western Balkan countries the HIV prevalence rate is under 0.1 percent which ranks among the lowest This may be due to a low level of infection among the population or partly due to inadequate surveillance systems All major contributing factors for the breakout of an HIV AIDS epidemic are present in the Western Balkans HIV AIDS disproportionately affects youth 80 percent of HIV infected people are 30 years old or younger Most of the Western Balkan countries have very young p Public Health Aspects of HIV/AIDS in Low and Middle Income Countries David Celentano,Chris Beyrer,2008-09-11 It has now been 25 years since the apocryphal report in the CDC Morbidity and Mortality Weekly Report dated June 5 1981 entitled Pneumocystis Pneumonia Los Angeles which announced what was to become HIV AIDS HIV has now affected virtually all countries that have looked for it and has had a devastating impact on the public health and medical care infrastructure around the world HIV AIDS has also disproportionately affected nations with the least capacity to confront it especially the developing world nations in Sub Saharan Africa South and Southeast Asia and the emerging republics of Eastern and Central Asia The pandemic unlike any other disease of our time has had profound impacts on the practice of public health itself bringing affected communities into decision making demanding North South partnerships and collaborations and changing the basic conduct of clinical and prevention trials research While much has been written in scholarly publications for medical epidemiologic and disease control specialists there is no comprehensive review of the public health impact and response to HIV AIDS in the developing world This edited volume seeks to systematically describe the emergence and form of the epidemics epidemiology the social community and political response and the various measures to confront and control the epidemic with varying levels of success Of particular importance are strategies that appear to have been useful in ameliorating the epidemic while contrasting the situation in a neighboring country or region where contrasting prevention or care initiatives have had a deleterious outcome Common to all responses has been the international multi sectoral response represented by the Global Fund for HIV AIDS Malaria and Tuberculosis the President s Emergency Plan for AIDS Relief and the Gates Foundation among others to promote HIV pharmacologic therapy in resource poor settings The chapter authors will explore the political challenges in meeting HIV AIDS prevention and care in concert with the public health realities in specific country and regional context **World AIDS Day Report 2024** UNAIDS,2024-11-26 The world s decades long response to HIV is at an inflection point The 2024 UNAIDS global report The Urgency of Now demonstrated that the world now has the means to end AIDS as a public health threat by 2030 Midway to the 2025 milestone set in June 2021 the global HIV response has moved closer to the goal of ending AIDS as a public health threat by 2030 a commitment enshrined in the Sustainable Development Goals SDGs Fewer people acquired HIV in 2023 than at any point since the late 1980s Despite successes the world is not on track to end AIDS by 2030 At this historic crossroads the path the world takes towards ending AIDS or towards a future of needless illness death and unending

costs depends on political will How to end AIDS as a public health threat is not in doubt This report focuses on the essentials the central role of human rights as it relates to ensuring access to HIV prevention and treatment services and addressing the structural determinants that increase vulnerability to HIV An approach grounded in human rights is vital for the collective HIV response to be robust person centred and sustainable HIV services will reach people in need only if their human rights are upheld if discriminatory and harmful laws are removed and if stigma discrimination and violence are effectively tackled

The Global HIV Epidemics among Sex Workers Deanna Kerrigan,Andrea Wirtz,Stefan Baral,N'Della N'Jie,Anderson Stanciole,Jenny Butler,Robert Oelrichs,Chris Beyer,2012-12-01 A global economic analysis of HIV infection amongst sex workers finding that evidence based and rights affirming interventions are not implemented to the level that their efficacy warrants and that doing so at scale would be cost effective and deliver significant returns on investment **Comprehensive Textbook of AIDS Psychiatry** Paul Volberding,2017 The Comprehensive Textbook of AIDS Psychiatry provides insight into the interface between the psychiatric medical and social dimensions of HIV and AIDS and the need for a compassionate integrated and approach to the HIV pandemic with an emphasis on humanizing destigmatizing HIV The Political Economy of Narcotics Julia Buxton,2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America s strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition **AIDS Epidemic Update, December 2006** Joint United Nations Programme on HIV/AIDS.,World Health Organization,2006 This annual update reports on

developments in the global HIV AIDS epidemic and draws on the most recent data available to give global and regional estimates of its scope and human toll Despite promising developments in global efforts to address the AIDS epidemic including increased access to effective treatment and prevention programmes the number of people living with HIV continues to grow as does the number of deaths due to AIDS Findings for 2006 include the total number of people living with HIV is estimated at 39.5 million 4.3 million new cases during the year and an estimated 2.9 million deaths Sub Saharan Africa continues to bear the brunt of the global epidemic with 63 per cent of all adults and children with HIV globally and with its epicentre in southern Africa In the past two years the number of people living with HIV increased in every region in the world with the most striking increases in East Asia Eastern Europe and Central Asia where the number of people living with HIV in 2006 was over 21 per cent higher than in 2004 **Morbidity and Mortality Weekly Report** ,2001
