Competition and Investment in Air Transport

Ruwantissa Abeyratne,2015-12-17 This book addresses emerging legal and economic issues in competition and investment in air transport against the backdrop of the role governments and airlines should play in avoiding protectionism and encouraging innovation and creativity It evaluates current trends in air transport and the direction the industry is taking in the twenty first century There are discussions on key aspects of air transport such as safety assurance and environmental protection as they are impacted by competition The rapid evolution of aerospace transport and its effect on competition in air transport is also examined A recurring theme of the book is the influence of creative destruction and disruptive innovation on air transport This is addressed through an in depth study of the contentious areas of law relating to the abuse of dominant positions and state aid as reflected in the ongoing claim by the three largest US carriers against Gulf carriers such as Emirates Airlines Etihad and Qatar Airways The US carriers claim that Emirates and Etihad which operate air services into the United States by virtue of an open skies agreement between the US and The United Arab Emirates are using generous subsidies given to them by their governments to illegally capture the legitimate market belonging to the US carriers These issues are clarified in the book using analyses of competition law and investment law as they apply to air transport free trade agreement analogies and an open skies case study

De la firme sous-traitante de premier rang à la firme pivot Frédéric

Mazaud,2007 Cette thèse analyse les transformations des relations industrielles verticales et plus particulièrement le glissement actuel de la fonction de sous traitant de premier rang vers une fonction de firme pivot qui est un acteur intermédiaire entre le donneur d'ordres et les sous traitants de second rang L'objectif est de caractériser cette fonction d'intermédiation en se basant sur la segmentation stratégique de la chaîne des fournisseurs et en prenant pour exemple l'organisation industrielle d'Airbus Deux modes de coordination arm's length et systems integration coexistent au sein d'une même architecture industrielle Le recours l'un ou l'autre varie en fonction de la politique d'achat et du degré stratégique des systèmes sous traités L'argumentation s'articule en deux parties La première revient sur la nature des relations verticales dans le cadre de productions complexes en mobilisant la théorie des ressources et des compétences La seconde caractérise et définit la firme pivot et analyse les transformations du système productif Airbus en clarifiant la stratégie d'achat et l'émergence d'un mode de coordination dual des sous traitants de premier rang L'architecture industrielle d'Airbus s'organise autour de firmes pivots

Les localisations industrielles au Maghreb Mihoub Mezouaghi, 2009. Les recompositions industrielles induites par la globalisation que l'actuelle crise économique internationale devrait accélérer tendent renouveler la géographie économique mondiale. Si les pays émergents confirment leur position de places industrielles s'ouvrent également des opportunités pour les pays en développement ayant manqué les précédentes vagues d'externalisation de la production. Au cours de ces dernières années les pays du Maghreb ont montré une aptitude inédite à l'attraction d'investissements étrangers dans des secteurs d'activités diversifiés résultant de nouvelles dynamiques productives pouvant modifier leur insertion dans la division internationale du travail. Pour autant peuvent-ils s'affirmer comme de nouveaux espaces de localisation industrielle? Des pistes de complémentarité peuvent-ils y merger? La contribution principalement empirique de cet ouvrage collectif repose sur une analyse originale des logiques de localisation industrielle en Algérie, au Maroc et en Tunisie en mobilisant deux concepts clés : celui de l'attractivité et celui de l'agglomération. Sur la base d'enquêtes de terrain, l'ouvrage propose d'examiner les déterminants de l'attractivité des pays du Maghreb, notamment dans les secteurs du textile, de l'automobile, de l'aéronautique et des services liés aux TIC, de qualifier les localisations industrielles observées dans les métropoles, leur périphérie et dans des pôles régionaux, et enfin de vérifier dans quelle mesure et sous quelles conditions l'agglomération des activités productives se traduit par la formation de territoires de production. La question alors soulevée est celle de la durabilité de ces localisations industrielles et de leur traduction en processus de développement local. Embracing the Track of Term: An Emotional Symphony within **Airbus Gress Document**

In a global taken by screens and the ceaseless chatter of immediate communication, the melodic splendor and mental symphony produced by the prepared term frequently fade into the back ground, eclipsed by the relentless noise and interruptions that permeate our lives. However, set within the pages of **Airbus Gress Document** a charming literary prize full of fresh thoughts, lies an immersive symphony waiting to be embraced. Constructed by a wonderful musician of language, this interesting masterpiece conducts readers on a mental trip, skillfully unraveling the hidden tunes and profound influence resonating within each cautiously crafted phrase. Within the depths of this moving examination, we shall examine the book is key harmonies, analyze its enthralling publishing design, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
