Airbus A320 Manual Softcopy:

Aviation and Its Management Arif Sikander, 2019-05-22 Aviation has grown leaps and bounds within the last decade. Aviation courses and training at all levels have shown an exponential increase around the globe. There has been a restricted focus on writing books in this sector of the economy mainly due to the shortage of expertise in this specialist and complex area. This book was written with the purpose of meeting this need of the aviation sector. Due to the diversified nature of aviation knowledge which includes flying, engineering, airports, allied trades for aircraft and airports, airline and airport management and operations education etc, one text alone will not suffice and do justice to address all these areas. It is envisaged to develop subsequent parts of this book to cover all these knowledge areas. This book is the first installment of any subsequent books and explores issues including airline management and operations, airline business models, airport systems, flight operational procedures, aircraft maintenance, runway safety management systems and air traffic management. In particular, attention will be given to aspects such as analysis of air traffic in a domestic market, runway safety management systems, critical success factors for multiple MRO service providers, key pain points of the industry to be addressed to move into the future, new research on hub airports for international flights, new business models for airlines and runway safety management systems. This book is useful to aviation managers, educators, students and professionals interested in any of the above issues.

The Routledge Handbook of Translation, Interpreting and Crisis Christophe Declercq, Koen Kerremans, 2023-12-22 This handbook offers a broad ranging overview of the study of translating and interpreting in conflict and crisis settings and takes the field in new directions. Covering a wide selection of multimodal contexts that build on the fundamentals of translation, interpreting and their in-between hybrid forms of mediation, the handbook is divided into four parts. The opening part covers perspectives on policy and practices, whether contemporary or historical, and cases truly span the globe from Peru and Brazil over Belgium and Sierra Leone to Australia, Japan and Hong Kong. International developments require profound considerations about the professionalisation of access to language in times of crises, not least in contexts of humanitarian negotiation or conflict zone interpreting. These form the second part. The subsequent part deals with spheres of community in which language needs are positioned within frames of agency, positionality and trust and the challenges that these face. The contributions build on cases where interpreters act as catalysts for translation needs in settings of humanitarian aid and beyond. The final part considers language strategies and solutions in crises. This handbook is the essential guide to translation and interpreting in conflict and crisis settings for advanced students and researchers of translation and interpreting studies and will be of wide interest in peace studies, political science and beyond.
