Delving deeper into the agricultural transformation and youth employment nexus Adesugba, Margaret Abiodun, Mavrotas, George, 2016-04-19 Youth employment is not an entirely new topic for research and policy Recent estimates from the International Labour Organisation ILO 2013a suggest that high and rising unemployment rates among youth remain a key challenge to global development especially in the developing world This is particularly important in sub Saharan Africa where about 85 percent of youth defined by the ILO as all those between the ages of 15 and 24 years are poor 70 percent live in rural areas where agriculture is the main source for their income and subsistence and 11 million youth are expected to enter the labor market every year for the next decade World Bank 2014 These characteristics of youth in sub Saharan Africa justify the centrality of the nexus between youth employment and agriculture in formulating development policy on the continent At the same time youth unemployment is currently one of the issues receiving attention at the top of the global development agenda

Bank Insolvency Law in Developing Economies Kayode Akintola,Folashade Adeyemo,2022-12-30 The subject of bank stability has been under a great amount of political and legislative scrutiny since the mid 2007 to late 2009 global financial crisis However these efforts have centred on developed economies Little coverage is given to strategies adopted by many developing economies While there is a global discourse on the subject of insolvency generally there is ample scope to contribute to the growing body of work on the narrow subject of bank insolvencies This book provides a unique perspective on an emerging theme in at least two respects First is the focus on selected developing economies and selected developed economies in the EMEA region alongside cross border developments with the objective of deciphering the regulatory approach to bank insolvencies The second is the analytical consideration of methods that may be implemented to preclude or resolve bank insolvencies in developing economies This book explores the nexus between developing economies and their banking institutions Developing economies are acutely dependent on their banks for the functioning of their cash based economies Recent events however suggest a weakness in the long term viability of some of their banks and a mixed bag regulatory approach to redress this weakness This book evaluates the effectiveness of regulatory frameworks in selected developing economies that are designed to prevent or resolve the insolvency of banks At a time of global economic uncertainty this book will prove to be a valuable resource to the discourse on the viability of banks businesses and economies in developing States

policy implementations the key objectives of the book have been achieved *Nigeria's Resource Wars* Egodi Uchendu, 2021-03-02 Nigeria's Resource Wars reflects on the diversity of conflicts over access to and allocation of resources in Nigeria. From the devastating effects of crude oil exploration in the Niger Delta to desertification caused by climate change and illegal gold mining in Zamfara to mention a few, Nigeria faces new dimensions of resource-related struggles. The ravaging effects of these resource conflicts between crop farmers and Fulani herders in Nigeria's Middlebelt and states across Southern Nigeria call for urgent scholarly interventions with the Fulani cattle breeders onslaught altering the histories of many Nigerian families through deaths, loss of homes and investments and permanent physical incapacity. Currently, there is an almost total breakdown of interethnic relations with political commentators acknowledging that Nigeria has never been so divided as it presently is in its history. The struggles have now degenerated into kidnaps, armed robbery and incessant targeted and random killings across the country, compounding the already complex problem of insecurity in Nigeria. The chapters in this volume engage with these issues, presenting the different arguments on resource conflicts in Nigeria. They draw insights from similar conflicts in Nigeria's colonial post-independence past and events from around the world to proffer possible solutions to resource-related confrontations in Africa. By offering a collection of different intellectual perspectives on resource conflicts in Nigeria, this volume will be an important reference material for understanding the diversity of thought patterns that underpin the struggle and policy approaches towards resolving conflict situations in Africa. This volume will be of considerable interest to scholars of Africa, researchers in the humanities, social sciences and conflict studies and policymakers interested in understanding the resource crisis in Africa. Local Government and Metropolitan Regions in Federal Countries John Kincaid, Nico Steytler, 2009-07-01 While local government is found in all federal countries, its place and role in the governance of these countries varies considerably. In some countries, local government is considered an essential part of the federal nature of the state and recognized in the constitution as such, whereas in others it is simply a creature of the subnational states/provinces. When referring to local government, it is more correct to refer to local governments plural as these institutions come in all shapes and sizes, performing widely divergent functions. They range from metropolitan municipalities of mega cities to counties, small town councils and villages. Their focus is either multi-purpose in the case of municipalities or single purpose in the case of special districts and school districts. What unites these institutions of state is that there is no level of government below them. That is also their strength and the source of their democratic claim: they are the government closest to the people. Political science experts from across the globe examine local governments by drawing on case studies of Australia, Austria, Brazil, Canada, Germany, India, Mexico, Nigeria, Switzerland, Spain, South Africa and United States. Contributors include Martin Burgi, Ruhr University Bochum; Luis Cesar de Queiroz Ribeiro, Federal University of Rio de Janeiro; Jaap de Visser, University of Western Cape; Habu Galadima, University of Jos; Sol Garson, Federal University of Rio de Janeiro; Boris Graizbord, National College of Mexico; Rakesh Hooja, HCM Rajasthan State Institute
