What is the Economic Census?

The Economic Census is the U.S. government's official 5-year measure of American business and the economy. Only the Economic Census provides information on industry revenues and other measures of American business performance that are consistent, comparable, and comprehensive across industries and geographic areas. For more information, go to

census.gov/EconomicCensus.

When does the U.S. Census Bureau conduct the Economic Census?

The Census Bureau's Economic Census collects reliable business statistics essential to understanding the American economy every 5 years—in years ending in "2" and "7."

Is it mandatory?

Yes. Response to the Economic Census is required by law. Title 13 of the United States Code requires businesses and other organizations that receive this questionnaire to answer the questions and return the report to the Census Bureau.

Why is the Economic Census important to me?

Data from the Economic Census is important for your industry, your community, and your business:

- Your trade association and chamber of commerce rely on information from the census for economic development and business decisions.
- Government agencies, analysts, and business organizations nationwide also rely on census information for planning purposes and for completing key economic reports.
- Information provided by the Economic Census can help you support decisions and planning for your own business.

Is my information kept confidential?

Yes. Title 13 ensures the following protections to individuals and businesses.

Participating in U.S. Census Bureau censuses and surveys is safe. The Census Bureau is required by law to protect your information and keep your responses strictly confidential. It's against the law for the Census Bureau to publicly release your responses in any way that could identify you, your household, or your organization.
