The Barsoom Expedition Charles Howerton, 2023-10-05 About the Book Launching a scientific research mission to Mars is no easy task but in The Barsoom Expedition it is made nearly impossible by a shady group of powerful people who want to win the race to Mars and lay claim to it and all its resources Bribes threats whipping up a phony religious outcry sabotage and even more drastic actions are taken to prevent Barsoom Explorer from staffing her crew Captain Ian McMichael and his friend and former crewmate Alexi Gargorin a nuclear engineer are tapped to lead a brilliant group of people who were gathered and trained in secret to prevent outside interference or influence After the Explorer launches perfectly with its unique propulsion system it suffers one problem after another from a mischievous ferret on the loose to booby traps set by saboteurs currently on board Gifted pilots and sisters Miriam Steinmetz and Rachael Purlman prove indispensable as each crisis arises as do the other members of the crew those not attempting to destroy the mission that is Outer space must be navigated gingerly and that precariousness comes alive in vivid detail in this epic story of humanity working toward a goal in an unforgiving environment and with bad guys breathing down their neck About the Author Charles Howerton has a PhD in computer science and before retiring spent the last fifteen years of his career teaching computer science and software engineering at the college level He was first introduced to computers in June 1957 three days after he graduated from high school His hobby if you can call it that is writing imaginative fiction More stories one of which is a sequel to The Barsoom Expedition are in the works His family is made up of two sons a daughter stepdaughter five grandchildren and twin great grandsons

England The estate was called Brooklands Those marshy acres were transformed from 1907 into the world's first custom built motor racing circuit then a rapidly developing aerodrome and finally one of the country's largest aircraft factories employing tens of thousands of people Nearly 19 000 aircraft of many different types were built at Brooklands during nine decades of peace and war By the 1980s however it was being eclipsed by larger manufacturing sites elsewhere with longer runways and better communications links its owner by then called British Aerospace finally closed the factory in 1989 This book tells the history of those amazing developments through 100 of the key aircraft engines places and other objects that can still be seen either in or near Brooklands Museum or in other locations around the country It also highlights the stories of six designers whose inspiring creativity produced aircraft engines and weapons ranging from Camel to Concorde Fury to Harrier Wellington to Viscount Merlin to Olympus Between them Thomas Sopwith Barnes Wallis Rex Pierson Sydney Camm Stanley Hooker and George Edwards were responsible for much of what was designed built and flown not only at Brooklands but elsewhere too The book is arranged in successive historical episodes but the many links between the objects and the designers should allow readers to follow different paths if they so wish It is not intended as a technical reference but rather to inspire the reader to seek out the objects and discover more about them
