Intelligence and Security Informatics Paul Kantor, Gheorghe Muresan, Fred Roberts, Daniel Zeng, Frei-Yue Wang, Hsinchun Chen, Ralph Merkle, 2005-04-25 Intelligence and security informatics ISI can be broadly defined as the study of the development and use of advanced information technologies and systems for national and international security related applications through an integrated technological, organizational and policy based approach. In the past few years ISI research has experienced tremendous growth and attracted substantial interest from academic researchers in related fields as well as practitioners from both government agencies and industry. The first two meetings ISI 2003 and ISI 2004 in the ISI symposium and conference series were held in Tucson, Arizona in 2003 and 2004 respectively. They provided a stimulating intellectual forum for discussion among previously disparate communities: academic researchers in information technologies, computer science, public policy and social studies; local, state and federal law enforcement and intelligence experts; and information technology industry consultants and practitioners. Building on the momentum of these ISI meetings and with sponsorship by the IEEE, we held the IEEE International Conference on Intelligence and Security Informatics ISI 2005 in May 2005 in Atlanta, Georgia. In addition to the established and emerging ISI research topics covered at past ISI meetings, ISI 2005 included a new track on Terrorism Informatics, which is a new stream of terrorism research leveraging the latest advances in social science methodologies and information technologies and tools. ISI 2005 was jointly hosted by Rutgers, the State University of New Jersey, the University of Arizona, UA and the Georgia Institute of Technology, GATECH. **Frontiers of High Performance Computing and Networking** Geyong Min, 2006-11-22 This book constitutes the refereed joint proceedings of ten international workshops held in conjunction with the 4th International Symposium on Parallel and Distributed Processing and Applications, ISPA 2006, held in Sorrento, Italy, in December 2006. It contains 116 papers that contribute to enlarging the spectrum of the more general topics treated in the ISPA 2006 main conference. **Handbook of Magnetic Materials** K.H.J. Buschow, 2009-10-24 Volume 18 of the Handbook of Magnetic Materials, as the preceding volumes, has a dual purpose. As a work of reference, it is intended for scientists active in magnetism research. To this dual purpose, Volume 18 is composed of topical review articles written by leading authorities. In each of these articles, an extensive description is given in graphical as well as in tabular form, much emphasis being placed on the discussion of the experimental material in the framework of physics, chemistry and material science. It provides readers with novel trends and achievements in magnetism.
