Luo,2019-11-06 This book focuses on human adaptive thermal comfort in the building environment and the balance between reducing building air conditioning energy and improving occupants thermal comfort It examines the mechanism of human thermal adaptation using a newly developed adaptive heat balance model and presents pioneering findings based on an online survey real building investigation climate chamber experiments and theoretical models The book investigates three critical issues related to human thermal adaptation i the dynamics of human thermal adaptation in the building environment ii the basic rules and effects of human physiological acclimatization and psychological adaptation and iii a new adaptive heat balance model describing behavioral adjustment physiological acclimatization psychological adaptation and physical improvement effects Providing the basis for establishing a more reasonable adaptive thermal comfort model the book is a valuable reference resource for anyone interested in future building thermal environment evaluation criteria **Weapons**

and the Law of Armed Conflict William H. Boothby,2016-03-10 Bringing together the law of armed conflict governing the use of weapons into a single volume the fully updated Second Edition of Weapons and the Law of Armed Conflict interprets these rules and discusses the factors influencing future developments in weapons law After relating the historical evolution of weapons law the book discusses the important customary principles that are the foundation of the subject and provides a condensed account of the law that exists on the use of weapons The treaties and customary rules applying to particular categories of weapon are thereafter listed and explained article by article and rule by rule in a series of chapters Having stated the law as it is the book then explores the way in which this dynamic field of international law develops in the light of various influences The legal review of weapons is discussed both from the perspective of how such reviews should be undertaken and how such a system should be established Having stated the law as it is the book then investigates the way in which this dynamic field of international law develops in the light of various influences In the final chapter the prospects for future rule change are considered This Second Edition includes a discussion of new treaty law on expanding bullets the arms trade and norms in relation to biological and chemical weapons It also analyses the International Manuals on air and missile warfare law and on cyber warfare law the challenges posed by lethal autonomous weapon systems and developments in the field of information and telecommunications otherwise known as cyber activities **Sources and Composition of Ambient**

Particulate Matter Manousos-Ioannis Manousakas,2021-09-10 Research related to ambient particulate matter PM remains very relevant today due to the adverse effects that PM have on human health PM are pollutants with varying chemical compositions and may originate from multiple emission sources which directly affects their toxicity To formulate effective control and mitigation strategies it is necessary to identify PM sources and to estimate their influence on ambient PM concentration a process that is known as source apportionment SA Depending on the geographical location and characteristics of an area many anthropogenic and natural sources may contribute to PM concentration levels such as dust resuspension sea salt traffic secondary aerosol formation industrial emissions ship emissions biomass burning power plant

emissions etc Different methodological approaches have been used over the years to study the aforementioned topics but some scientific challenges remain mainly related to the following subjects real time chemical analysis and SA uncertainty estimation of SA results and analytical optimization for PM samples Additionally there are areas in the world for which the results regarding composition and sources of PM are still scarce The objective of this collection was to include studies on all aspects of PM chemical characterization and source apportionment regarding the inorganic and or organic fractions of PM
