Airbus Structure Manual:

Fibre Metal Laminates Ad Vlot, Jan Willem Gunnink, 2011-06-28 Fibre metal laminates were developed at Delft University of Technology in The Netherlands from the beginning of the 1980s This is a new family of hybrid materials consisting of thin metal layers bonded together by fibres embedded in an adhesive As a result of this build up fibre metal laminates possess a mixture of the characteristics of both metals and composite materials Initial development led to the Arall variant using aramid fibres which was first applied on the C 17 military transport aircraft around 1990 Large scale application became possible with a variant using glass fibres dubbed Glare which was selected for the Airbus A380 super jumbo in 2001 This is the first book to discuss these new materials and it deals mostly with Glare It covers most of the relevant aspects of the materials from static mechanical properties fatigue and impact to design production and maintenance of aircraft structures This book contains the basic information on these new materials necessary for engineers and aircraft operators alike

Introduction to Maintenance, Repair and Overhaul of Aircraft, Engines and Components

Shevantha Weerasekera, 2020-12-29 Introduction to Maintenance Repair and Overhaul of Aircraft Engines and Components brings together the basic aspects of a fundamentally important part of the aerospace industry the one that supports the global technical efforts to keep passenger and cargo planes flying reliably and safely Over time aircraft components and structural parts are subject to environmental effects such as corrosion and other types of material deterioration wear and fatigue Such parts could fail in service and affect the safe operation of the aircraft if the degradation were not detected and addressed in time Regular planned maintenance supports the current and future value of the aircraft by minimizing the physical decline of the aircraft and engines throughout its life Introduction to Maintenance Repair and Overhaul of Aircraft Engines and Components was written by the industry veteran Shevantha K Weerasekera an aerospace engineer with 20 years of aircraft maintenance experience who currently leads the engineering team of a major technical enterprise in the field

Introduction to Aerospace Structures and Materials René Alderliesten, 2018-12-12 This book provides an introduction to the discipline of aerospace structures and materials It is the first book to date that includes all relevant aspects of this discipline within a single monologue These aspects range from materials manufacturing and processing techniques to structures design principles and structural performance including aspects like durability and safety With the purpose of introducing students into the basics of the entire discipline the book presents the subjects broadly and loosely connected adopting either a formal description or an informal walk around type of presentation A key lessons conveyed within this book is the interplay between the exact science and engineering topics like solid material physics and structural analysis and the soft topics that are not easily captured by equations and formulas Safety manufacturability availability and costing are some of these topics that are presented in this book to explain decisions and design solutions within this discipline
