Medicine E-Book Sudhansu Chokroverty, 2009-09-09 Dr Sudhansu Chokroverty a world recognized expert in sleep medicine presents the third edition of Sleep Disorders Medicine for the latest developments in this rapidly expanding specialty with coverage of neuroscience and clinical application. In addition to summarizing basic science and important technological aspects of diagnosis and treatment this edition presents new chapters on sleep and memory consolidation, neuroimaging and more in a color layout that makes it easy to access the latest advances in the field. The text's manageable size and logical multi-disciplinary approach make it the right choice for newcomers and experienced clinicians alike. Covers all aspects of sleep medicine in a practical logical format divided into three sections: the basic science of sleep physiology, neuroanatomy and biochemistry; the technical methods of recording; and a clinical approach to patients with sleep complaints. Represents the breadth of knowledge across disciplines through the contributions of 50 prominent names in the field of sleep medicine. Provides a multidisciplinary approach to the diagnosis and management of sleep disorders with coverage of related fields such as pulmonology, otolaryngology and psychiatry. Includes a Glossary of Terms adapted from the American Sleep Disorders Association for quick reference to the sleep terminology used throughout the text. Demonstrates how recent basic science advances affect clinical medicine through new chapters on Sleep Deprivation and Sleepiness, Sleep and Memory Consolidation, Neuroimaging in Sleep and Sleep Disorders, Nutrition and Sleep, Nature and Treatment of Insomnia, Evolution of Sleep from Birth through Adolescence, Sleep Disordered Breathing in Children and Women's Sleep. Improves on the clarity and consistency of the text with a new completely redrawn art program including full color illustrations in the clinical section that enhances diagnostic material. **Biological Science** Freeman, Scott Freeman, Warren W. Longino,2018-06-05 Helen Longino seeks to break the current deadlock in the ongoing wars between philosophers of science and sociologists of science academic battles founded on disagreement about the role of social forces in constructing scientific knowledge While many philosophers of science downplay social forces claiming that scientific knowledge is best considered as a product of cognitive processes sociologists tend to argue that numerous noncognitive factors influence what scientists learn how they package it and how readily it is accepted Underlying this disagreement however is a common assumption that social forces are a source of bias and irrationality Longino challenges this assumption arguing that social interaction actually assists us in securing firm rationally based knowledge This important insight allows her to develop a durable and novel account of scientific knowledge that integrates the social and cognitive Longino begins with a detailed discussion of a wide range of contemporary thinkers who write on scientific knowledge clarifying the philosophical points at issue She then critically analyzes the dichotomous understanding of the rational and the social that characterizes both sides of the science studies stalemate and the social account that she sees as necessary for an epistemology of science that includes the full spectrum of cognitive processes Throughout her account is responsive both to the normative uses of the term knowledge and to the social conditions in which scientific

knowledge is produced Building on ideas first advanced in her influential book *Science as Social Knowledge* Longino brings her account into dialogue with current work in social epistemology and science studies and shows how her critical social approach can help solve a variety of stubborn problems While the book focuses on epistemological concerns related to the sociality of inquiry Longino also takes up its implications for scientific pluralism The social approach she concludes best allows us to retain a meaningful concept of knowledge in the face of theoretical plurality and uncertainty
