Native and Non-Native Teachers in English Language Classrooms Juan de Dios Martinez Agudo, 2017-05-08 Despite being highly debated in applied linguistics and L2 teaching literature the controversial issue of non nativeness still remains unresolved Contemporary critical research has questioned the theoretical foundations of the nativeness paradigm which still exerts a strong influence in the language teaching profession Written by well known researchers and teacher educators from all over the world both NSs and NNSs the selected

contributions of this volume cover a great variety of aspects related to the professional role and status of both NS and NNS teachers in terms of both perceived differences and professional concerns and challenges. The strongest aspects of this volume are the global perspectives and the implications for future research and teacher education. It is precisely this international perspective which makes this volume illustrative of different realities with a similar objective in mind: the improvement of second language teaching and teacher education. In today's world, being a NS or NNS should not really matter but rather teachers' professional competences. This publication thus provides a forum of reflection and discussion for all L2 educators who need to be aware of how much they might offer to their future students. The Journal of Education, 1884. *Current Index to Journals in Education*, 1997-10. **Annual Report** Namibia. Ministry of Basic Education, Sport, and Culture, 2004. **Educational Measurement** Robert L. Brennan, 2006-08-30. The importance of this fourth edition of Educational Measurement is to extensively update and extend the topics treated in the previous three editions. As such, the fourth edition documents progress in the field and provides critical guidance to the efforts of new generations of researchers and practitioners. This new edition of Educational Measurement is edited by Robert Brennan and jointly sponsored by ACE and the National Council on Measurement in Education. It provides in-depth treatments of important measurement topics and the chapter authors are acknowledged experts in their respective fields. NATIONAL COUNCIL ON MEASUREMENT IN EDUCATION is an organization incorporated for scientific, educational, literary and charitable purposes, i.e. advancing of the science of measurement instruments and procedures, improving applications of measurement and disseminating knowledge about measurement theory, techniques and instrumentation. *School Leadership for Democratic Education in South Africa* Tsediso Michael Makoelle, Thabo Makhalemele., Pierre du Plessis, 2021-07-29. *School Leadership for Democratic Education in South Africa* explores the democratization and modernization of education in South Africa, analyzing the state of school leadership in South African schools from the time of the new democratic education dispensation in 1994 to the present day. The book maps out what the future of education in South Africa could look like and explores the most conducive educational environments for change in South African schools. It adopts a critical approach to analyzing leadership and management in the context of school governance, school effectiveness, teacher development, multiculturalism and equity in education. Contributions explore the democratization and modernization of education in South Africa through examining different perspectives, achievements and challenges, and also consider issues around access to technology, language policy and the curriculum along with new literature on selected aspects of leadership. This book will be of great interest for researchers, scholars and students in the fields of educational leadership, sociology of education and teacher education. Lithuania Organisation for Economic Co-operation and Development, Centre for Co-operation with Non-members, 2002. educators parents and students under very dynamic conditions **The Main Source** John P. Robinson, Mark R. Levy, 1986
The authors effectively challenge the myth that the public gets most of its news from television In a wide ranging study with European and US data they conclude that television is not the public s main source for news The Main Source uses innovative survey techniques to show that public understanding of news information is considerably higher than previous research has found and that television news presentation could be far more effective Extending the Partial Credit and Rating Scale Models Using the Hierarchical Multivariate Generalized Linear Model Jonathan R.
